The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center Docket is: (202) 566-1752. An electronic version of the public docket is available through EPA Dockets (EDOCKET) at <http://www.epa.gov/edocket>. Use EDOCKET to submit or to view public comments, to access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. When in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

Title: NESHP for Miscellaneous Metal Parts and Products (Renewal).

Abstract: This National Emission Standards for Hazardous Air Pollutants (NESHP) requires initial notification, performance tests, and periodic reports. Owners or operators also are required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required, in general, of all sources subject to NESHP.

Any owner or operator subject to the provisions of this part shall maintain a

file of these documents, and retain the file for at least five years following the date of such notifications, reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, Subpart Mmmm as authorized in Sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 198 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to adjust the existing ways to comply with any previously applicable instructions and requirements; to train personnel to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

Respondents/Affected Entities: Miscellaneous metal parts and products surface coating facilities.

Estimated Number of Respondents: 1,680.

Frequency of Response: Initial, Semiannually, On Occasion.

Estimated Total Annual Hour Burden: 675,050 hours.

Estimated Total Annual Costs: \$56,642,905, which includes \$1,667,000 annualized capital/startup costs, \$500,000 annual O&M costs, and \$54,475,905 annual labor costs.

Changes in the Estimates: There is an increase of 535,670 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to the recalculation of burden reflecting

activities undertaken by facilities to comply with 40 CFR part 63, subpart Mmmm over the three year period covered by this ICR.

Dated: August 23, 2005.

Title: Exclusion Determinations for New Non-road Spark-ignited Engines at or Below 19 Kilowatts, New Non-road Compression-ignited Engines, New Marine Engines, and New On-road Heavy Duty Engines (Renewal)

Abstract: Under the provisions of the Clean Air Act (Act), the Administrator is required to promulgate regulations to control air pollutant emissions from "motor vehicles" and "non-road engines", as defined in the Act. Motor vehicles and non-road engines not meeting the applicable definitions are excluded from compliance with current regulations.

A manufacturer may make an exclusion determination by itself; however, manufacturers and importers may routinely request EPA to make such determination to ensure that their determination does not differ from the Agency's. To request an exclusion determination, manufacturers submit a letter with a description of the engine and/or vehicle (engine type, horsepower rating, intended usage, etc.) and a sales brochure to the Engine Programs Group (EPG), Certification and Compliance Division, Office of Transportation and Air Quality. EPG uses this information to determine whether the engine or vehicle is excluded from compliance with one or more emission regulations. EPG then stores the data in its internal files, and makes it available to environmental groups and the public upon request under the Freedom of Information Act.

Responses to this collection are voluntary. Confidentiality to proprietary information is granted in accordance with the Freedom of Information Act, EPA regulations at 40 CFR part 2, and class determinations issued by EPA's Office of General Counsel.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 7 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or

for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Light Truck and Utility Vehicle Manufacturers; Heavy Duty Truck Manufacturers; Gasoline Engine and Engine Parts Manufacturers; Construction Machinery Manufacturers; Industrial Truck, Tractor, Trailer, and Stacker Machinery Manufacturers; Marine Engine Manufacturers; Other Engine Equipment Manufacturers

Estimated Number of Respondents: 12
Frequency of Response: One time voluntary

Estimated Total Annual Hour Burden: 69

Estimated Total Annual Cost: \$5,654, which includes \$0 annualized capital/startup costs, \$116 annual O&M costs, and \$5,538 annual labor costs.

Changes in the Estimates: There is no change in the total estimated burden hours currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: August 23, 2005.
