II. What Action is EPA Taking?

This document extends the public comment period established in the *Federal Register* of July 13, 2005 (70 FR 40336) (FRL–7721–3). In that document, EPA made available the human health and environmental fate and effects risk assessments for methyl bromide. Methyl bromide is a broad-spectrum fumigant chemical that can be used as an

acaricide, antimicrobial, fungicide, herbicide, insecticide, nematocide, and vertebrate control agent. The most prevalent use pattern is as a soil fumigant; however, it is also used as a structural fumigant and for post harvest treatment of commodities. The Agency developed these risk assessments as part of its public process for making pesticide reregistration eligibility and tolerance reassessment decisions. Through these programs, EPA is ensuring that pesticides meet current standards under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA). The Agency received a request from the Methyl Bromide Industry Panel of the American Chemistry Council to extend the comment period. EPA is hereby extending the comment period, which was set to end on September 12, 2005, by 30 days. The comment period will now end on October 12, 2005. This extension is being given based on the Agency's delay in providing legible copies of the appendices supporting the risk assessments.
