

Council by developing a comprehensive EFH Management Plan. A complete description of the background and need for the Omnibus Amendment and a list of scoping hearings can be found in the original February 24, 2004, NOI and are not repeated here.

Due largely to public clarity and issues of complexity, the Council intends to complete the EFH Omnibus Amendment 2 action in two phases or volumes with one accompanying EIS and Magnuson-Stevens Act document. Separation of this large action into two phases (volumes) will allow for the continued sequential development of the Omnibus Amendment but avoids the creation of an extremely large and complex action that may not be decipherable from the public's perspective. Further, in order to meet the Sustainable Fisheries Act intention of the EFH mandate, it is prudent to take a step-wise approach. For instance, it is necessary to determine what is EFH prior to conducting an evaluation of the potential effects of fishing gear on EFH and to develop a range of alternatives to minimize, mitigate or avoid any impacts that are more than minimal and less than temporary in nature. As such, the Council would complete the Omnibus Amendment 2 in two phases. Phase 1 (Volume 1 of the EIS) would include a review and update of EFH designations and consideration of HAPCs (not including consideration of management measures or restrictions), an update of prey species list, an update of non-fishing impacts, and an update of research and information needs. Phase 2 (Volume 2 of the EIS) would include reviewing and updating a gear effects evaluation and optimizing management measures for minimizing the adverse effects of fishing on EFH across all FMPs, including the potential consideration of management measures for HAPCs designated in Phase 1. The proposed sequence of events is described in Table 1.
