II. What Action is EPA Taking?

This document extends the public comment period established in the *Federal Register* of July 13, 2005 (70 FR 40339) (FRL-7721-8). In that document, EPA made available the human health risk assessment for dazomet. It is used as a non-selective, pre-plant soil fumigant with fungicidal, herbicidal, insecticidal, and nematocidal properties. Dazomet is converted to methyl isothiocyanate (MITC) in the environment, particularly in the presence of moisture (such as in soil after application). It is MITC that performs the fumigating activity. EPA is hereby extending the comment period, which was set to end on September 12, 2005, to October 12, 2005. The Agency received a request from the registrants Certis USA and the Society of American Florists and is therefore, granting the extension based on the volume and complexity of the documents being reviewed.
