The other information file is in the Public Library in Amargosa Valley, Nevada (phone 775–372–5340). As of the date of publication, the hours are Monday, Wednesday, and Friday (9 a.m.–5 p.m.); Tuesday and Thursday (9 a.m.–7 p.m.); and Saturday (9 a.m.–1 p.m.). The library is closed on Sunday. These hours can change, so we suggest that you call ahead to be certain when the library will be open.

2. Electronic Access. An electronic version of the public docket is available through EPA’s electronic public docket and comment system, EPA Dockets (EDOCKET). You may use EDOCKET to submit or view comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. To access the docket either go directly to http://www.epa.gov/edocket or, from the EPA Internet Home Page (http://www.epa.gov), select “Information Sources” (in the left column), then “Dockets,” then “EPA Dockets” (in the first part of the page). For either route, then click on “Quick Search” (in the left column). In the search window, type in the docket identification number OAR–2005–0083. Please be patient, the search could take about 30 seconds. This will bring you to the “Docket Search Results” page. At that point, click on OAR–2005–0083. From the resulting page, you may access the docket contents (e.g., OAR–2005–0083–0002) by clicking on the icon in the “Rendition” column.

D. Can I Access Information by Telephone or via the Internet?

Yes. You may call our toll-free information line (800–331–9477) 24 hours per day. By calling this number, you may listen to a brief update of our rulemaking activities for Yucca Mountain Information Line at 1–800–331–9477 at any time. You will be asked to leave a message with the following information:

• Name/Organizational Affiliation (if any).
• Hearing date, location, time(s) available to testify.
• Daytime telephone number.
• Hearing date, location, time(s) available to testify.
Your call will be returned within one business day to confirm a scheduled time for testimony. In order to obtain a scheduled speaking time, EPA must receive requests no later than September 30, 2005, for the hearings in Amargosa Valley and Las Vegas, Nevada; and October 7, 2005, for the hearing in Washington, DC. Speakers not registered in advance may register at the door but are not guaranteed the opportunity to testify, depending on time constraints (all individuals will also be able to comment in writing or on tape). Individuals testifying on their own behalf will be allowed 5 minutes. Groups or organizations must designate one individual to testify as the official representative, and each group will be allocated ten minutes for an oral presentation. Individuals and organizations may submit written comments in addition to oral testimony. Time allowed is exclusive of any time consumed by questions from the government panel and answers to these questions. Testimony from individuals and representatives of organizations is limited to one hearing location. In order to ensure that all individuals and groups are given an opportunity to testify, substitutions will not be permitted for any pre-registered person. Registrants will not be permitted to yield their time to other individuals or groups, nor will hearing time be used to “read into the record” testimony from individuals not present at the hearings. In the event any person wishes to enter comments for the record, but either cannot or does not appear personally at the hearings, EPA will accept written comments during the hearings and other meetings. These written comments will be considered to the same extent as oral testimony and will be included as part of the official hearings transcripts. The hearing transcript will constitute the official record of the hearings. Written comments submitted outside of the public hearings must be received by EPA Docket OAR–2005–0083 in Washington, DC, by October 4, 2005. All comments received by EPA, whether written or oral, will be given equal consideration in development of the final rule.

Dated: September 8, 2005.
William L. Wehrum,
Acting Assistant Administrator for Air and Radiation.

[FR Doc. 05–18226 Filed 9–13–05; 8:45 am]
BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300
[FRL–7968–4]

National Priorities List for Uncontrolled Hazardous Waste Sites, Proposed Rule No. 43

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: The Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA” or “the Act”), as amended, requires that the National Oil and Hazardous Substances Pollution Contingency Plan (“NCP”) include a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The National Priorities List (“NPL”) constitutes this list. The NPL is intended primarily to guide the Environmental Protection Agency

on August 27, 1999 (64 FR 46976) and June 13, 2001 (66 FR 32074), respectively.

II. Meeting Purpose and Format

The meetings will provide opportunities for both informal exchanges of information and formal comments. Meeting formats are as follows:

• Information Sessions: an informal opportunity to learn about the standards, meet EPA staff, and ask questions. Comments on the record can also be provided in writing or on tape.
• Roundtable Dialogues: a facilitated conversation with EPA staff to discuss the standards and allow opportunities for the public to ask questions of EPA staff, and for EPA to respond. A summary of key points and questions will be recorded for the record.
• Public Hearings: a formal opportunity to make verbal statements that will be recorded for the public record. For the convenience of the public, individuals and organizations should schedule a specific time to make their comments (see Hearings Procedures below).

Hearing Procedures

Persons wishing to testify at any of the public hearings are requested to preregister by calling EPA’s toll-free Yucca Mountain Information Line at 1–800–331–9477 at any time. You will be asked to leave a message with the following information:

• Hearing date, location, time(s) available to testify.
• Daytime telephone number.

Your call will be returned within one business day to confirm a scheduled time for testimony. In order to obtain a scheduled speaking time, EPA must receive requests no later than September 30, 2005, for the hearings in Amargosa Valley and Las Vegas, Nevada; and October 7, 2005, for the hearing in Washington, DC. Speakers not registered in advance may register at the door but are not guaranteed the opportunity to testify, depending on time constraints (all individuals will also be able to comment in writing or on tape). Individuals testifying on their own behalf will be allowed 5 minutes. Groups or organizations must designate one individual to testify as the official representative, and each group will be allocated ten minutes for an oral presentation. Individuals and organizations may submit written comments in addition to oral testimony. Time allowed is exclusive of any time consumed by questions from the usual language for the earlier proposed and final rules, which appeared in the Federal Register.
I. Background

A. What Are CERCLA and SARA?

In 1980, Congress enacted the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601–9675 ("CERCLA" or "the Act"), in response to the dangers of uncontrolled releases or threatened releases of hazardous substances, and releases or substantial threats of releases into the environment of any pollutant or contaminant which present an imminent or substantial danger to the public health or welfare. CERCLA was amended on October 17, 1986, by the Superfund Amendments and Reauthorization Act ("SARA"), Public Law 99–499, 100 Stat. 1613 et seq.

B. What Is the NCP?

To implement CERCLA, EPA promulgated the revised National Oil and Hazardous Substances Pollution Contingency Plan ("NCP"), 40 CFR part 300, on July 16, 1982 (47 FR 31180), pursuant to CERCLA section 105 and Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP sets guidelines and procedures for responding to releases and threatened releases of hazardous substances, or releases or substantial threats of releases into the environment of any pollutant or contaminant which may present an imminent or substantial danger to the public health or welfare. EPA has revised the NCP on several occasions. The most recent comprehensive revision was on March 8, 1990 (55 FR 8666).

As required under section 105(a)(8)(A) of CERCLA, the NCP also includes "criteria for determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action and, to the extent practicable, taking into account the potential urgency of such action for the purpose of taking removal action. . . . "Removal" actions are defined broadly and include a wide range of actions taken to study, clean up, prevent or otherwise address releases and threatened releases of hazardous substances, pollutants or contaminants (42 U.S.C. 9601(23)).
C. What Is the National Priorities List (NPL)?

The NPL is a list of national priorities among the known or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The list, which is appendix B of the NCP (40 CFR part 300), was required under section 105(a)(8)(B) of CERCLA, as amended by SARA. Section 105(a)(8)(B) defines the NPL as a list of “releases” and the highest priority “facilities” and requires that the NPL be revised at least annually. The NPL is intended primarily to guide EPA in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with a release of hazardous substances, pollutants or contaminants. The NPL is only of limited significance, however, as it does not assign liability to any party or to the owner of any specific property. Neither does placing a site on the NPL mean that any remedial or removal action necessarily need be taken. For purposes of listing, the NPL includes two sections, one of sites that are generally evaluated and cleaned up by EPA (the “General Superfund Section”), and one of sites that are owned or operated by other Federal agencies (the “Federal Facilities Section”). With respect to sites in the Federal Facilities Section, these sites are generally being addressed by other Federal agencies. Under Executive Order 12580 (52 FR 2923, January 29, 1987) and CERCLA section 120, each Federal agency is responsible for carrying out most response actions at facilities under its own jurisdiction, custody, or control, although EPA is responsible for preparing a Hazard Ranking System (HRS) score and determining whether the facility is placed on the NPL. At Federal Facilities Section sites, EPA’s role is less extensive than at other sites.

D. How Are Sites Listed on the NPL?

There are three mechanisms for placing sites on the NPL for possible remedial action (see 40 CFR 300.425(c) of the NCP): (1) A site may be included on the NPL if it scores sufficiently high on the Hazard Ranking System (“HRS”), which EPA promulgated as appendix A of the NCP (40 CFR part 300). The HRS serves as a screening device to evaluate the relative potential of uncontrolled hazardous substances, pollutants or contaminants to pose a threat to human health or the environment. On December 14, 1990 (55 FR 51532), EPA promulgated revisions to the HRS partly in response to CERCLA section 105(c), added by SARA. The revised HRS evaluates four pathways: ground water, surface water, soil exposure, and air. As a matter of Agency policy, those sites that score 28.50 or greater on the HRS are eligible for the NPL; (2) Pursuant to 42 U.S.C. 9605(a)(8)(B), each State may designate a single site as its top priority to be listed on the NPL, without any HRS score. This provision of CERCLA requires that, to the extent practicable, the NPL include one facility designated by each State as the greatest danger to public health, welfare, or the environment among known facilities in the State. This mechanism for listing is set out in the NCP at 40 CFR 300.425(c)(2); (3) The third mechanism for listing, included in the NCP at 40 CFR 300.425(c)(3), allows certain sites to be listed without any HRS score, if all of the following conditions are met:

- The Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service has issued a health advisory that recommends dissociation of individuals from the releases;
- EPA determines that the release poses a significant threat to public health;
- EPA anticipates that it will be more cost-effective to use its remedial authority than to use its removal authority to respond to the release.

EPA promulgated an original NPL of 406 sites on September 8, 1983 (48 FR 40658) and generally has updated it at least annually.

E. What Happens to Sites on the NPL?

A site may undergo remedial action financed by the Trust Fund established under CERCLA (commonly referred to as the “Superfund”) only after it is placed on the NPL, as provided in the NCP at 40 CFR 300.425(b)(1). (“Remedial actions” are those “consistent with permanent remedy, taken instead of or in addition to removal actions. * * *’’ 42 U.S.C. 9601(24)). However, under 40 CFR 300.425(b)(2) placing a site on the NPL “does not imply that monies will be expended.” EPA may pursue other appropriate authorities to respond to the releases, including enforcement action under CERCLA and other laws.

F. Does the NPL Define the Boundaries of Sites?

The NPL does not describe releases in precise geographical terms; it would be neither feasible nor consistent with the limited purpose of the NPL (to identify releases that are priorities for further evaluation), for it to do.

Although a CERCLA “facility” is broadly defined to include any area where a hazardous substance has “come to be located” (CERCLA section 101(9)), the listing process itself is not intended to define or reflect the boundaries of such facilities or releases. Of course, HRS data (if the HRS is used to list a site) upon which the NPL placement was based will, to some extent, describe the release(s) at issue. That is, the NPL site would include all releases evaluated as part of that HRS analysis.

When a site is listed, the approach generally used to describe the relevant release(s) is to delineate a geographical area (usually the area within an installation or plant boundaries) and identify the site by reference to that area. As a legal matter, the site is not coextensive with that area, and the boundaries of the installation or plant are not the “boundaries” of the site. Rather, the site consists of all contaminated areas within the area used to identify the site, as well as any other location to which that contamination has come to be located, or from which that contamination came. In other words, while geographic terms are often used to designate the site (e.g., the “Jones Co. plant site”) in terms of the property owned by a particular party, the site properly understood is not limited to that property (e.g., it may extend beyond the property due to contaminant migration), and conversely may not occupy the full extent of the property (e.g., where there are uncontaminated parts of the identified property, they may not be, strictly speaking, part of the “site”). The “site” is thus neither equal to nor confined by the boundaries of any specific property that may give the site its name, and the name itself should not be read to imply that this site is coextensive with the entire area within the property boundary of the installation or plant. The precise nature and extent of the site are typically not known at the time of listing. Also, the site name is merely used to help identify the geographic location of the contamination. For example, the name “Jones Co. plant site,” does not imply that the Jones company is responsible for the contamination located on the plant site. EPA regulations provide that the “nature and extent of the problem presented by the release” will be determined by a Remedial Investigation/Feasibility Study (“RI/FS”) as more information is developed on site contamination (40 CFR 300.5). During the RI/FS process, the release may be found to be larger or smaller than was originally thought, as more is learned about the source(s) of the contamination of the site. However, this inquiry focuses on an evaluation of the
thrust posed; the boundaries of the release need not be exactly defined. Moreover, it generally is impossible to discover the full extent of where the contamination “has come to be located” before all necessary studies and remedial work are completed at a site. Indeed, the boundaries of the contamination can be expected to change over time. Thus, in most cases, it may be impossible to describe the boundaries of a release with absolute certainty.

Further, as noted above, NPL listing does not assign liability to any party or to the owner of any specific property. Thus, if a party does not believe it is liable for releases on discrete parcels of property, supporting information can be submitted to the Agency at any time after a party receives notice it is a potentially responsible party. For these reasons, the NPL need not be amended as further research reveals more information about the location of the contamination or release.

G. How Are Sites Removed From the NPL?

EPA may delete sites from the NPL where no further response is appropriate under Superfund, as explained in the NCP at 40 CFR 300.425(e). This section also provides that EPA shall consult with states on proposed deletions and shall consider whether any of the following criteria have been met: (i) Responsible parties or other persons have implemented all appropriate response actions required; (ii) All appropriate Superfund-financed response has been implemented and no further response action is required; or (iii) The remedial investigation has shown the release poses no significant threat to public health or the environment, and taking of remedial measures is not appropriate.

H. May EPA Delete Portions of Sites From the NPL as They Are Cleaned Up?

In November 1995, EPA initiated a new policy to delete portions of NPL sites where cleanup is complete (60 FR 55465, November 1, 1995). Total site cleanup may take many years, while portions of the site may have been cleaned up and available for productive use.

I. What Is the Construction Completion List (CCL)?

EPA also has developed an NPL construction completion list (“CCL”) to simplify its system of categorizing sites and to better communicate the successful completion of cleanup activities (58 FR 12142, March 2, 1993). Inclusion of a site on the CCL has no legal significance. Sites qualify for the CCL when: (1) Any necessary physical construction is complete, whether or not final cleanup levels or other requirements have been achieved; (2) EPA has determined that the response action should be limited to measures that do not involve construction (e.g., institutional controls); or (3) The site qualifies for deletion from the NPL. For the most up-to-date information on the CCL, see EPA’s Internet site at http://www.epa.gov/superfund.

II. Public Review/Public Comment

A. May I Review the Documents Relevant to This Proposed Rule?

Yes, documents that form the basis for EPA’s evaluation and scoring of the sites in this rule are contained in public dockets located both at EPA Headquarters in Washington, DC and in the Regional offices.

How Do I Access the Documents?

You may view the documents, by appointment only, in the Headquarters or the Regional dockets after the publication of this proposed rule. The hours of operation for the Headquarters docket are from 8:30 a.m. to 4:30 p.m., Monday through Friday excluding Federal holidays. Please contact the Regional dockets for hours.

The following is the contact information for the EPA Headquarters docket: Docket Coordinator, Headquarters; U.S. Environmental Protection Agency; CERCLA Docket Office; 1301 Constitution Avenue; EPA West, Room B102, Washington, DC 20004, 202/566–0276. (Please note this is a visiting address only. Mail comments to EPA Headquarters as detailed at the beginning of this preamble.) The contact information for the Regional dockets is as follows:

J. What Documents Are Available for Public Review at the Headquarters Docket?

The Headquarters docket for this rule contains the following for the sites proposed in this rule: HRS score sheets; Documentation Records describing the information used to compute the score; information for any sites affected by particular statutory requirements or EPA listing policies; and a list of documents referenced in the Documentation Record.

D. What Documents Are Available for Public Review at the Regional Dockets?

The Regional dockets for this rule contain all of the information in the
A. Executive Order 12866: Regulatory Planning and Review

1. What Is Executive Order 12866?

Under Executive Order 12866, 51 FR 51735 (October 4, 1993) the Agency must determine whether a regulatory action is “significant” and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may: (1) Have an annual impact on the economy of $100 million or more or adversely affect a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the Executive Order.

2. Is This Proposed Rule Subject to Executive Order 12866 Review?

No. The listing of sites on the NPL does not impose any obligations on any entities. The listing does not set standards or a regulatory regime and imposes no liability or costs. Any liability under CERCLA exists irrespective of whether a site is listed. It has been determined that this action is not a “significant regulatory action” under the terms of Executive Order 12866 and is therefore not subject to OMB review.

B. Paperwork Reduction Act

1. What is the Paperwork Reduction Act?

According to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 et seq., an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations, after initial display in the preamble of the final rules, are listed in 40 CFR part 9.

2. Does the Paperwork Reduction Act Apply to This Proposed Rule?

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq., because this rule does not contain any information collection requirements that require approval of the OMB.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing.

E. How Do I Submit My Comments?

Comments must be submitted to EPA Headquarters as detailed at the beginning of this preamble in the ADDRESSES section. Please note that the addresses differ according to method of delivery. There are two different addresses that depend on whether comments are sent by express mail or by postal mail.

F. What Happens to My Comments?

EPA considers all comments received during the comment period. Significant comments will be addressed in a support document that EPA will publish concurrently with the Federal Register document if, and when, the site is listed on the NPL.

G. What Should I Consider When Preparing My Comments?

Comments that include complex or voluminous reports, or materials prepared for purposes other than HRS scoring, should point out the specific information that EPA should consider and how it affects individual HRS factor values or other listing criteria (Northside Sanitary Landfill v. Thomas, 849 F.2d 1516 (D.C. Cir. 1988)). EPA will not address voluminous comments that are not specifically cited by page number and referenced to the HRS or other listing criteria. EPA will not address comments unless they indicate which component of the HRS documentation record or what particular point in EPA’s stated eligibility criteria is at issue.

H. May I Submit Comments After the Public Comment Period Is Over?

Generally, EPA will not respond to late comments. EPA can only guarantee that it will consider those comments postmarked by the close of the formal comment period. EPA has a policy of generally not delaying a final listing decision solely to accommodate consideration of late comments.

I. May I View Public Comments Submitted by Others?

During the comment period, comments are placed in the Headquarters docket and are available to the public on an “as received” basis. A complete set of comments will be available for viewing in the Regional docket approximately one week after the formal comment period closes.

All public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA’s electronic public docket (EPA Dockets at http://www.epa.gov/edocket as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose disclosure is restricted by statute. Once in the EPA Dockets system, select “search,” then key in the Docket ID No. SFUND–2005–0005. For additional information about EPA’s electronic public docket, visit EPA Dockets online at http://www.epa.gov/edocket or see the May 31, 2002 Federal Register (67 FR 38102).

J. May I Submit Comments Regarding Sites Not Currently Proposed to the NPL?

In certain instances, interested parties have written to EPA concerning sites which were not at that time proposed to the NPL. If those sites are later proposed to the NPL, parties should review their earlier concerns and, if still appropriate, resubmit those concerns for consideration during the formal comment period. Site-specific correspondence received prior to the period of formal proposal and comment will not generally be included in the docket.

III. Contents of This Proposed Rule

A. Proposed Additions to the NPL

In today’s proposed rule, EPA is proposing to add five new sites to the NPL; all to the General Superfund Section of the NPL. All of the sites in this proposed rulemaking are being proposed based on HRS scores of 28.50 or above. The sites are presented in Table 1 which follows this preamble.

IV. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review

1. What Is Executive Order 12866?

Under Executive Order 12866, 51 FR 51735 (October 4, 1993) the Agency must determine whether a regulatory action is “significant” and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. The Order defines “significant regulatory action” as one that is likely to result in a rule that may: (1) Have an annual impact on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the Executive Order.

No. The listing of sites on the NPL does not impose any obligations on any entities. The listing does not set standards or a regulatory regime and imposes no liability or costs. Any liability under CERCLA exists irrespective of whether a site is listed. It has been determined that this action is not a “significant regulatory action” under the terms of Executive Order 12866 and is therefore not subject to OMB review.

B. Paperwork Reduction Act

1. What is the Paperwork Reduction Act?

According to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 et seq., an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations, after initial display in the preamble of the final rules, are listed in 40 CFR part 9.

2. Does the Paperwork Reduction Act Apply to This Proposed Rule?

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq., because this rule does not contain any information collection requirements that require approval of the OMB.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing.

E. How Do I Submit My Comments?

Comments must be submitted to EPA Headquarters as detailed at the beginning of this preamble in the ADDRESSES section. Please note that the addresses differ according to method of delivery. There are two different addresses that depend on whether comments are sent by express mail or by postal mail.

F. What Happens to My Comments?

EPA considers all comments received during the comment period. Significant comments will be addressed in a support document that EPA will publish concurrently with the Federal Register document if, and when, the site is listed on the NPL.

G. What Should I Consider When Preparing My Comments?

Comments that include complex or voluminous reports, or materials prepared for purposes other than HRS scoring, should point out the specific information that EPA should consider and how it affects individual HRS factor values or other listing criteria (Northside Sanitary Landfill v. Thomas, 849 F.2d 1516 (D.C. Cir. 1988)). EPA will not address voluminous comments that are not specifically cited by page number and referenced to the HRS or other listing criteria. EPA will not address comments unless they indicate which component of the HRS documentation record or what particular point in EPA’s stated eligibility criteria is at issue.

H. May I Submit Comments After the Public Comment Period Is Over?

Generally, EPA will not respond to late comments. EPA can only guarantee that it will consider those comments postmarked by the close of the formal comment period. EPA has a policy of generally not delaying a final listing decision solely to accommodate consideration of late comments.

I. May I View Public Comments Submitted by Others?

During the comment period, comments are placed in the Headquarters docket and are available to the public on an “as received” basis. A complete set of comments will be available for viewing in the Regional
and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations in 40 CFR are listed in 40 CFR part 9.

C. Regulatory Flexibility Act

1. What Is the Regulatory Flexibility Act?

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 et seq., as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996) whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies the rule will not have a significant economic impact on a substantial number of small entities. SBREFA amended the Regulatory Flexibility Act to require Federal agencies to provide a statement of the factual basis for certifying that a rule will not have a significant economic impact on a substantial number of small entities.

2. How Has EPA Complied With the Regulatory Flexibility Act?

This proposed rule listing sites on the NPL, if promulgated, would not impose any obligations on any group, including small entities. This proposed rule, if promulgated, also would not impose any standards or requirements that any small entity must meet, and would impose no direct costs on any small entity. Whether an entity, small or otherwise, is liable for response costs for a release of hazardous substances depends on whether that entity is liable under CERCLA 107(a). Any such liability exists regardless of whether the site is listed on the NPL through this rulemaking. Thus, this proposed rule, if promulgated, would not impose any requirements on any small entity. For the foregoing reasons, I certify that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

D. Unfunded Mandates Reform Act

1. What Is the Unfunded Mandates Reform Act (UMRA)?

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal Agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with “Federal mandates” that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year. Before EPA promulgates a rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law.

Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

2. Does UMRA Apply to This Proposed Rule?

No, EPA has determined that this rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and tribal governments in the aggregate, or by the private sector in any one year. This rule will not impose any Federal intergovernmental mandate because it imposes no enforceable duty upon State, tribal or local governments. Listing a site on the NPL does not itself impose any costs. Listing does not mean that EPA necessarily will undertake remedial action. Nor does listing require any action by a private party or impose responsibility for response costs. Costs that arise out of site responses result from site-specific decisions regarding what actions to take, not directly from the act of listing a site on the NPL.

For the same reasons, EPA also has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments. In addition, as discussed above, the private sector is not expected to incur costs exceeding $100 million. EPA has fulfilled the requirement for analysis under the Unfunded Mandates Reform Act.

E. Executive Order 13132: Federalism

1. What Is Executive Order 13132 and Is It Applicable to This Proposed Rule?

Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” “Policies that have federalism implications” is defined in the Executive Order to include regulations that have “significant direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.”

Under section 6 of Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law, unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. Thus, the
requirements of section 6 of the Executive Order do not apply to this rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

1. What Is Executive Order 13175?

Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive Order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.”

2. Does Executive Order 13175 Apply to This Proposed Rule?

This proposed rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this proposed rule.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

1. What Is Executive Order 13045?

Executive Order 13045: “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be “economically significant” as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

2. Does Executive Order 13045 Apply to This Proposed Rule?

This proposed rule is not subject to Executive Order 13045 because it is not an economically significant rule as defined by Executive Order 12866, and because the Agency does not have reason to believe the environmental health or safety risks addressed by this proposed rule present a disproportionate risk to children.

H. Executive Order 13211

1. What Is Executive Order 13211?

Executive Order 13211, “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355 (May 22, 2001)), requires EPA to prepare and submit a Statement of Energy Effects to the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, for certain actions identified as “significant energy actions.” Section 4(b) of Executive Order 13211 defines “significant energy actions” as “any action by an agency (normally published in the Federal Register) that promulgates or is expected to lead to the promulgation of a final rule or regulation, including notices of inquiry, advance notices of proposed rulemaking, and notices of proposed rulemaking: (1)(i) That is a significant regulatory action under Executive Order 12866 or any successor order, and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (2) that is designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action.”

2. Is This Rule Subject to Executive Order 13211?

This proposed rule is not subject to Executive Order 13211, “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355 (May 22, 2001)) because it is not a significant regulatory action under Executive Order 12866 (See discussion of Executive Order 12866 above.)

I. National Technology Transfer and Advancement Act

1. What Is the National Technology Transfer and Advancement Act?

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note), directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

2. Does the National Technology Transfer and Advancement Act Apply to This Proposed Rule?

No. This proposed rulemaking does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 05–2339; MB Docket No. 05–263; RM–11269]

Radio Broadcasting Services; Church Rock and Grants, NM

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rule making filed by Millennium Media, Inc. (“Petitioner”), licensee of Station KYVA–FM, Channel 279C, Grants, New Mexico. Petitioner requests that the Commission reallocate Channel 279C from Grants to Church Rock, New Mexico, and modify its license accordingly. The coordinates for Channel 279C at Church Rock are 35–36–18 NL and 108–41–11 WL, with a site restriction of 11.2 kilometers (6.9 miles) northwest of Church Rock.

DATES: Comments must be filed on or before October 17, 2005, and reply comments on or before November 1, 2005.

ADDRESSES: Secretary, Federal Communications Commission, 445 12th Street, SW., Room TW–A325, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve a copy of their comments on the Petitioner and its counsel, as follows: James P. Riley, Esq., Fletcher, Heald, & Hildreth, PLC; 1300 North 17th Street, 11th Floor, Arlington, Virginia 22209.

FOR FURTHER INFORMATION CONTACT: R. Barthen Gorman, Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission’s Notice of Proposed Rule Making, MB Docket No. 05–263, adopted August 24, 2005 and released August 26, 2005. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Information Center at Portals II, 445 12th Street, SW., CY–A257, Washington, DC 20554. This document may also be purchased from the Commission’s duplicating contractors, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone 1–800–378–3160 or http://www.BCPIWEB.com.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 05–2340, MB Docket No. 05–185, RM–11236]

Radio Broadcasting Services; Tenino, WA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; dismissal.

SUMMARY: This document dismisses a pending petition for rulemaking filed by Dr. Sandra L. Woodruff to allot Channel 229C3 at Tenino, Washington for failure to state a continuing interest in the requested allotment. The document therefore terminates the proceeding. See 70 FR 30050, published May 25, 2005.

FOR FURTHER INFORMATION CONTACT: Helen McLean, Media Bureau (202) 418–2738.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission’s Report and Order, MB Docket No. 05–185, adopted August 24, 2005, and released August 26, 2005. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Information Center (Room CY–A257), 445 12th Street, SW., Washington, DC. This document may also be purchased from the Commission’s duplicating contractors, Best Copy and Printing, Inc., 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone 1–800–378–3160 or http://www.BCPIWEB.com.

This document is not subject to the Congressional Review Act. (The Commission, is, therefore, not required to submit a copy of this Report and Order to GAO, pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A) since this proposed rule is dismissed, herein.)

Federal Communications Commission.

John A. Karousos,
Assistant Chief, Audio Division, Media Bureau.
