

manually operated switches. Yard movement is controlled by a yardmaster. Due to the configuration and service demands, the yard cannot facilitate the placement of a derail at the 150-foot interval as prescribed in § 218.29. Additionally, LIRR believes that lining and locking the manual switches increases potential error of proper switch alignment, and is a safety concern for all employees working in the area. Therefore, LIRR requests that employees at these two facilities be allowed to place derails at a distance of 50-feet from the equipment. LIRR states that they will post signage to reinforce the 5 mph speed restriction, as well as paint physical clearance lines denoting the 50-foot distance.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favour of relief.

Strategic Transportation Services

[Docket Number FRA-2005-21961]

Strategic Transportation Services, on behalf of EXEL Switching Services, seeks a waiver of compliance with the Safety Glazing Standards 49 CFR 223.9(a), which requires Locomotives, including yard locomotives, built or rebuilt after June 30, 1980, must be equipped with certified glazing in all locomotive cab windows, and with the requirements of the Safety Appliance Standards 49 CFR 231.3(c)(1) & (c)(4), which requires Each locomotive used in switching service must have four (4) switching steps & Switching steps must be supported by a bracket at each end and fastened to the bracket by two bolts or rivets of at least one-half (1/2) inch diameter or by a weldment of at least twice the strength of a bolted attachment. Strategic Transportation Services requests the waiver for a "Rail King" mobile railcar mover that they intend to utilize to switch railcars inside the Exel facility, business park, in Houston, TX. The Rail King mobile railcar mover described in the waiver request is not equipped with FRA Type I & II certified glazing material and only has two switching steps that are attached to the vehicle by weldment.
