OMB Control Number: 0596-0182.

Summary of Collection: The Forest Service (FS) objective is, "To have available and utilize adequate types and quantities of qualified fire chemical products to accomplish fire management activities safely, efficiently, and effectively." To accomplish their objective, FS evaluates chemical products that may be used in direct wildland fire suppression operations prior to their use on lands managed by the FS. Need and Use of the Information: FS will collect the listing of individual ingredients and quantity of these ingredients in the formulation of a product being submitted for evaluation in order to test the products. The entity submitting the information provides the FS with the specific ingredients used in its product and identifies the specific source of supply for each ingredient. For Water Enhancer products the FS requires that a Technical Data Form be completed, the information collected here is specific mixing requirements and hydration requirements for water enhancer products. The information provided will allow the FS to search the List of Known and Suspected Carcinogens, as well as the Environment Protection Agency's List of Highly Hazardous Materials, to determine if any of the ingredients appear on any of these lists.
