Use of Ancillary Service Endorsement for Mailing Certain Types of Checks

AGENCY: Postal Service.

ACTION: Proposed rule; withdrawal.

SUMMARY: The Postal Service is withdrawing a proposed rule that would require ancillary service endorsements on mailpieces containing certain types of checks.

DATES: Withdrawal effective October 14, 2005.

FOR FURTHER INFORMATION CONTACT:

William Chatfield, Mailing Standards, United States Postal Service, 202-268-7278.

SUPPLEMENTARY INFORMATION: In a proposed rule published in the **Federal Register** on October 27, 2004 (69 FR 6263), the Postal Service presented for public comment a proposed revision to Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM®) to require the use of ancillary service endorsements on mailpieces containing certain types of checks mailed at Standard Mail postage rates. The proposed revision was intended to protect postal customers.

We received comments from the financial industry discussing a number of safeguards for customers that reduce the incidence of fraud and the misuse of information on these checks. We have concluded that the requirements in our proposal are unnecessary, and we withdraw our proposal.

Approval and Promulgation of Air Quality Implementation Plans; Wisconsin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a revision to the Wisconsin State Implementation Plan (SIP) for an

alternative volatile organic compounds (VOC) control device for Serigraph, Incorporated (Serigraph). On May 18, 2005, the Wisconsin Department of Natural Resources submitted a request to revise the Wisconsin SIP. The proposed revision approves Serigraph's use of a biofilter to control VOC emissions from its printing facility in Washington County, Wisconsin. The biofilter system will reliably control emissions at or below the level of the control methods listed in the SIP. Serigraph has designed one of its plants as a permanent total enclosure (PTE), which captures all VOC emissions and routes them to the biofilter. There are no fugitive emissions from the plant. This reduces the total VOC emissions from Serigraph's facility.

In the final rules section of this **Federal Register**, EPA is approving the SIP revision as a direct final rule without prior proposal, because EPA views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. We do not intend to take any further action in relation to this proposed rule unless we receive adverse comment this action. If EPA receives adverse comment, we will withdraw the direct final rule and will respond to all public comments in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.
