

information or a trade secret, the submitter may provide a brief description of the new technology for posting on the Web site.

The FSIS New Technology Web site will contain a listing of new technologies for which the Agency, after review, has issued a "No Objection" letter, which states that the Agency does not object to the use of the new technology. The Web site listing will provide the name of the company and a brief summary of the new technology, either provided by the submitting company or prepared by the Agency based on data provided by the submitter. The Web site listing will be updated on a weekly basis, and new technologies posted will remain on the Web site for a period of twelve months.

Once the Agency determines that it has no objection to the use of a proposed new technology, it sends the submitting company a "No Objection" letter. The letter will include the description of the new technology that the Agency intends to post to the Web site. The letter will state that, if the company does not object within five (5) working days from the date it receives the letter, the Agency will post the included description of the technology on the Web site. If the company objects to the description, it should state that it objects to the description, explain the basis for its objection (e.g., proprietary agreement, confidential commercial information, etc.), and provide an alternate description. FSIS will post the alternate description, unless the Agency concludes that the description does not fairly describe the technology. In such a case, FSIS will post the description that it prepared. FSIS will notify the company of its decision.
