SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau is the preeminent collector of timely, relevant and quality data about the people and economy of the United States. Economic data are the Census Bureau's primary program commitment during non-decennial census years. The economic census, conducted under authority of Title 13

U.S.C., is the primary source of facts about the structure and functioning of the Nation's economy and features unique industry and geographic detail. Economic census statistics serve as part of the framework for the national accounts and provide essential information for government, business and the general public.

Prior to conducting the 2007 Economic Census, the Census Bureau needs to collect a North American Industry Classification System (NAICS) code from selected construction establishments. Those establishments selected have a partially assigned NAICS code on the Census Bureau's Business Register. Collecting this classification information will ensure the Economic Census mailing list for the construction sector is complete and accurate prior to the mailing of the 2007 Economic Census. As a result of this collection, the Census Bureau will be able to select an efficient sample, thus minimizing the reporting burden that we impose on construction establishments.

Additionally, this questionnaire will be used to collect a complete and reliable NAICS code for partially classified manufacturing and mining establishments. This will ensure these establishments are tabulated in the correct detailed industry for the 2007 Economic Census. Many of these establishments will not receive any further economic census mailings because of their small size, and this will be our only chance to obtain this detailed industry classification. Economic data for these cases could be lost if this data were not collected.

The failure to collect this classification information will have an adverse effect on the quality and usefulness of economic statistics and severely hamper the Census Bureau's ability to effectively classify establishments under NAICS in the Economic Census and other survey programs.

The Census Bureau is not requesting any economic data in this collection. The collection of this NAICS information will greatly reduce processing costs and ease reporting burden for the 2007 Economic Census data collection.

II. Method of Collection

The Census Bureau will select establishments to receive this survey from the Census Bureau's Business Register. The Census Bureau will mail the NC-99026 to those establishments from the following groups: (1) Any single unit construction establishment that is partially coded, (2) any single

unit manufacturing establishment that is partially coded, or (3) any single unit mining establishment that is partially coded. The NC-99026 will be used to assign a valid NAICS code.

The NC-99026 will contain a list of codes and descriptions describing either diverse construction, manufacturing, or mining activities. Respondents check the box that best describes their business activity or describe their business activity if no box is appropriate.

III. Data

Foreign-Trade Zones Board

[Docket 51-2005]

Foreign-Trade Zone 202- Los Angeles, California, Request for Processing Authority, Citizen Watch Company of America, Inc. (Watches)

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Port of Los Angeles, California, grantee of FTZ 202, requesting authority on behalf of Citizen Watch Company of America, Inc. (Citizen) for the processing and packaging of watches under FTZ procedures within Site 7 of FTZ 202 in Torrance, California. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 Cfr part 400). It was formally filed on October 19, 2005.

Citizen operates a distribution facility (182 employees) for the warehousing, packaging and distribution of watches. The company's application indicates that the duty rates for finished watches range from duty-free to 6 percent (ad valorem equivalent). Foreign-sourced inputs include imported gift boxes, watch bands, watch cases and other materials with duty rates ranging from duty-free to 20 percent.

This application requests authority to allow Citizen to conduct activities under FTZ procedures, which would exempt the company from Customs duty payments on the foreign components used in export activity. On its domestic sales, the company would be able to choose the duty rate that applies to finished products for the foreign components noted above. Citizen's application indicates that the savings from zone procedures could help improve the company's international competitiveness.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the following addresses:

1. *Submission Via Express/Package Delivery Services:* Foreign-Trade Zones Board, U.S. Department of Commerce, Franklin Court Building - Suite 4100W, 1099 14th St., NW, Washington, DC 20005; or

2. *Submission Via the U.S. Postage Service:* Foreign-Trade Zones Board, U.S. Department of Commerce, FCB - Suite 4100W, 1401 Constitution Ave., NW, Washington, DC 20230.

The closing period for their receipt is December 27, 2005. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to January 9, 2006).

A copy of the application and accompanying exhibits will be available for public inspection at the Office of the Foreign-Trade Zones Board's Executive Secretary at address Number 1 listed above, and at the Department of Commerce Export Assistance Center, 11150 West Olympic Blvd., Suite 975, Los Angeles, CA 90064.

Dated: October 19, 2005.

Dennis Puccinelli,

Executive Secretary.
