*Title:* NSPS for Glass Manufacturing Plants (Renewal).

*Abstract:* The New Source Performance Standards (NSPS) for glass manufacturing plants, were proposed on June 15, 1979, and promulgated on October 7, 1980, and amended on October 19, 1984. These standards apply to any glass manufacturing facility for which construction or modification commences after June 15, 1979. The standards do not apply to hand glass melting furnaces, glass melting furnaces designed to produce less than 4.55 Mg (5 tons) of glass per day, or all-electric melters. Experimental furnaces are not subject to the emission standards at 40 CFR 60.292.

Owners or operators of the affected facilities described must make initial notifications, conduct and report on a performance test, demonstrate and report on continuous monitor performance, maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports are required. These notifications, reports, and records are required, in general, for all sources subject to NSPS. The recordkeeping and reporting requirements specific to glass manufacturing plants are detailed in the 40 CFR part 60, subpart CC. This information is being collected to assure compliance with 40 CFR part 60, subpart CC.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office.

An agency respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

*Burden Statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to average eight hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop,

acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*Respondents/Affected Entities:* Owners or operators of glass manufacturing plants.

*Estimated Number of Respondents:* 41.

*Frequency of Response:* On occasion, semiannually, and initially.

*Estimated Total Annual Hour Burden:* 803 hours.

*Estimated Total Annual Costs:* \$302,601, which includes \$0 annualized capital/startup costs, \$237,800 in annual O&M costs, and \$64,801 in Respondent Labor costs.

*Changes in the Estimates:* There is an increase of 213 burden hours as compared to the active ICR. The increase in burden from the most recently approved ICR is due to the fact that we are presently accounting for management and clerical person hours per year, which was not accounted for in the active ICR. There was however, a decline of four sources as compared to the active ICR. This decline was due to plant closure and the high cost to retrofit aging facilities, and corporate mergers.

Dated: October 17, 2005.

## ENVIRONMENTAL PROTECTION AGENCY

[OW-2002-0011, FRL-7988-7]

### Agency Information Collection Activities; Submission to OMB for Review and Approval; Comment Request; Laboratory Quality Assurance Evaluation Program for Analysis of *Cryptosporidium* Under the Safe Drinking Water Act, EPA ICR Number 2067.03, OMB Control Number 2040-0246

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved collection. This ICR is scheduled to expire on October 31, 2005. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

**DATES:** Additional comments may be submitted on or before November 25, 2005.

**ADDRESSES:** Submit your comments, referencing docket ID number OW-2002-0012, to (1) EPA online using EDOCKET (our preferred method), by e-mail to [ow-docket@epamail.epa.gov](mailto:ow-docket@epamail.epa.gov), or by mail to: EPA Docket Center, Environmental Protection Agency, Water Docket, Mail Code 4101T, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** Sean Conley, Office of Groundwater and Drinking Water, (Mail Code 4607M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 202-564-1781; fax number: 202-564-3767; e-mail address: [conley.sean@epa.gov](mailto:conley.sean@epa.gov). For technical inquiries, contact Carrie Moulton, EPA, Office of Ground Water and Drinking Water, Technical Support Center, 26 West Martin Luther King Drive (MS-140), Cincinnati, Ohio 45268; fax number: (513) 569-7191; e-mail address: [moulton.carrie@epa.gov](mailto:moulton.carrie@epa.gov).

**SUPPLEMENTARY INFORMATION:** EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On June 3, 2005 (70 FR 32607), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA has addressed the comments received.

EPA has established a public docket for this ICR under Docket ID No. OW-2002-0012, which is available for public viewing at the Water Docket in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Water Docket is (202) 566-2426. An electronic version of the public docket is available through EPA Dockets (EDOCKET) at

<http://www.epa.gov/edocket>. Use EDOCKET to submit or view public comments, access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

**Title:** Laboratory Quality Assurance Evaluation Program for Analysis of *Cryptosporidium* under the Safe Drinking Water Act.

**Abstract:** Under the Laboratory Quality Assurance Evaluation Program, EPA evaluates labs on a case-by-case basis through evaluating their capacity and competency to reliably measure for the occurrence of *Cryptosporidium* in surface water using EPA Method 1622 or EPA Method 1623. To obtain approval under the program, the laboratory must submit an application package and provide: a demonstration of availability of qualified personnel and appropriate instrumentation, equipment and supplies; a detailed laboratory standard operating procedure for each version of the method that the laboratory will use to conduct the *Cryptosporidium* analyses; a current copy of the table of contents of their laboratory's quality assurance plan for protozoa analyses; and an initial demonstration of capability data for EPA Method 1622 or EPA Method 1623, which include precision and recovery test results and matrix spike/matrix

spike duplicate test results for *Cryptosporidium*.

After the laboratory submits to EPA an application package including supporting documentation, EPA and the laboratory conduct the following steps to complete the process:

1. EPA contacts the laboratory for follow-up information and to schedule participation in the performance testing program.

2. EPA sends initial proficiency testing samples to the laboratory (unless the laboratory has already successfully analyzed such samples under EPA's Protozoan PE program). These sample packets consist of eight spiked samples shipped to the laboratory within a standard matrix.

3. The laboratory analyzes initial proficiency testing samples and submits data to EPA.

4. EPA conducts an on-site evaluation and data audit.

5. The laboratory analyzes ongoing proficiency testing samples three times per year and submits the data to EPA. These sample packets consist of three spiked samples shipped to the laboratory within a standard matrix.

6. EPA contacts laboratories by letter within 60 days of their laboratory on-site evaluation to confirm whether the laboratory has demonstrated its capacity and competency for participation in the program.

The procedure for obtaining an application package, the criteria for demonstrating capacity and competency, and other guidance to laboratories that are interested in participating in the program, are provided at [http://www.epa.gov/safewater/lt2/cla\\_final.html](http://www.epa.gov/safewater/lt2/cla_final.html).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 19 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the

existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Public and private water testing laboratories.

**Estimated Number of Respondents:** 22.

**Frequency of Response:** Three times per year.

**Estimated Total Annual Hour Burden:** 3,980.

**Estimated Total Annual Cost:** \$275,000, includes \$109,000 annualized capital or O&M costs.

**Changes in the Estimates:** There is a decrease of 367 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is just an adjustment to the estimate.

Dated: October 18, 2005.
