Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration

Project: Drug Abuse Warning Network (OMB No. 0930-0078)—Revision

The Drug Abuse Warning Network (DAWN) is an ongoing data system that collects information on drug-related medical emergencies as reported from about 350 hospitals nationwide, and drug-related deaths as reported from 6 states and 135 medical examiners/coroner jurisdictions (ME/C) in 35 metropolitan areas. DAWN provides national and metropolitan estimates of substances involved with drug-related emergency department (ED) visits; disseminates information about substances involved in deaths investigated by participating medical examiners and coroners (ME/Cs); tracks drug abuse patterns, trends, and the emergence of new substances; monitors post-market adverse drug incidents; assesses health hazards associated with the use of illicit, prescription, and over-the-counter drugs; and generates information for national and local drug abuse policy and program planning. DAWN data are used by Federal, State, and local agencies, as well as universities, pharmaceutical companies, and the media.

From 2006 to 2008, DAWN will continue to recruit hospitals in the 13 oversampled metropolitan areas in order to improve the precision of estimates, adding approximately 18 hospitals to the sample. In 2007 and 2008, DAWN plans to recruit approximately 20 more ME/Cs from metropolitan areas that are currently profiled by DAWN, but have incomplete participation. DAWN data are submitted electronically, using eHERS (electronic Hospital Emergency Reporting System) and eMERS (electronic Medical Examiner Reporting System). DAWN proposes that all facilities (EDs and ME/Cs) will start using the revised electronic forms for all events occurring from 1/1/2006 forward. The annual burden estimates are shown below:
