[DA 05-2691, MB Docket No. 05-122, RM-11198]

Radio Broadcasting Services: Columbus and Monona, WI

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; dismissal.

SUMMARY: At Media Division dismisses the Petition for Rule Making filed by Good Karma Broadcasting, LLC, proposing the reallocation of Channel 263A from Columbus to Monona, Wisconsin, and the modification of Station WTLX(FM)'s license accordingly. RIN 0648-AT84

Endangered and Threatened Species; Revision of Critical Habitat for the Northern Right Whale in the Pacific Ocean

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Proposed rule; request for comment.

SUMMARY: National Marine Fisheries Service (NMFS) proposes to revise the current critical habitat for the northern right whale (*Eubalaena glacialis*) by designating additional areas within the North Pacific Ocean. Two specific areas proposed for designation, one in the Gulf of Alaska and another in the Bering Sea, comprise approximately 95,200 square kilometers (36,750 square miles) of marine habitat. Based upon the impacts analysis prepared for this action, NMFS has concluded that the benefits of exclusion of any area from the proposed critical habitat designation do not outweigh the benefits of inclusion. Consequently, no exclusions are proposed.

NMFS must consider the broad effects of this designation (revision). NMFS solicits comments from the public on all aspects of the proposal, including information on the economic, national security, and other relevant impacts of the proposed designation. NMFS may revise this proposal and solicit additional comments prior to final designation to address new information received during the comment period.

DATES: Comments on this proposed rule must be received by close of business on

January 3, 2006. Requests for public hearings must be made in writing by December 19, 2005.

ADDRESSES: Send comments to Kaja Brix, Assistant Regional Administrator, Protected Resources Division, Alaska Region, NMFS, Attn: Lori Durall. Comments may be submitted by:

• E-mail: 0648-AT84-NPRWCH@noaa.gov. Include in the subject line the following document identifier: Right Whale Critical Habitat PR. E-mail comments, with or without attachments, are limited to 5 megabytes.

SUPPLEMENTARY INFORMATION: The Endangered Species Act of 1973, as amended, [16 U.S.C. 1531] (ESA) imposes requirements upon Federal agencies regarding endangered or threatened species of fish, wildlife, or plants, and habitats of such species that have been designated as critical. The U.S. Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS) share responsibility for administering the ESA. Endangered or threatened species under the authority of NMFS are found in 50 CFR 222.102 and 224.101, and include the northern right whale.

Background

The northern right whale is a member of the family Balaenidae. It is found in the Pacific and Atlantic Oceans and is closely related to the right whales that inhabit the Southern Hemisphere. Right whales are large baleen whales which grow to lengths and weights exceeding 18 meters and 100 tons, respectively. They are filter feeders whose prey consists exclusively of zooplankton (notably copepods; see below). Right whales attain sexual maturity at an average age of 8 to 10 years, and females produce a single calf at intervals of 3 to 5 years (Kraus *et al.*, 2001). Their life expectancy is unclear, but they are known to reach 70 years in some cases (Hamilton *et al.*, 1998; Kenney, 2002).
