SUPPLEMENTARY INFORMATION:

I. Background

New Bedford Harbor is located in southeastern Massachusetts at the mouth of the Acushnet River on Buzzards Bay. The Harbor and River are contaminated with high levels of hazardous substances and materials, including PCBs, and as a consequence are on the U.S. Environmental Protection Agency's (EPA) Superfund National Priorities List. This site is also listed by the Massachusetts Department of Environmental Protection as a priority Tier 1 disposal site.

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund," 42 U.S.C. 9601 *et seq.*) designates as possible natural resource trustees Federal, state, or tribal authorities who represent the public interest in natural resources. The trustees are responsible for recovering funds through litigation or settlement for damages for natural resource injuries. CERCLA requires that any recovered monies be used to "restore, replace, or acquire the equivalent of" the natural resources that have been injured by a release of a hazardous substance.

For the New Bedford Harbor Superfund Site, there are three natural resource trustees on the Council representing the public interest in the affected natural resources. They are the Department of Commerce (DOC), the Department of the Interior, and the Commonwealth of Massachusetts. The Secretary of Commerce has delegated DOC trustee responsibility to NOAA; within NOAA, NMFS has responsibility for natural resource restoration at this site. The Secretary of the Interior has delegated trustee responsibility to the U.S. Fish and Wildlife Service. The Governor of Massachusetts has delegated trustee responsibility to the Secretary of Environmental Affairs.

To initiate restoration of the New Bedford Harbor Environment the Council previously issued two "Request(s) for Restoration Ideas" in October 1995 (60 FR 52164, October 5,
