Animal and Plant Health Inspection Service

Title: Importation of Pork-Filled Pasta.

OMB Control Number: 0579-0214.

Summary of Collection: The Animal and Plant Health Inspection Service (APHIS) is responsible for protecting the health of our Nation's livestock and poultry populations by preventing the introduction and interstate spread of serious diseases and pests of livestock and for eradicating such diseases from the United States when feasible. 9 CFR 94 Section 94-12 contains, among other things, specific processing, recordkeeping, and certification requirements for pork-filled pasta products exported to the United States from regions affected with swine vesicular disease. The regulations require that a certificate stating that the product has been handled and processed according to the requirements set forth in the regulations accompany the pork-filled pasta products.

Need and Use of the Information: The certificate must be completed and signed by the issuing official, and contains such information as the origin of the meat used in the product, the name and location of the facility that processed the product, and the product's intended destination. Without the information, it would significantly cripple APHIS' ability to ensure that pork-filled pasta from certain regions pose a minimal risk of introducing swine vesicular disease into the United States.

Description of Respondents: Business or other for-profit.

Number of Respondents: 5.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 125.

Forest Service

Tahoe National Forest; Sierraville Ranger District; California; Phoenix Project

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: The USDA Forest Service, Tahoe National Forest, Sierraville Ranger District gives notice of the Agency's intent to prepare an Environmental Impact Statement (EIS) to disclose the environmental effects of applying silvicultural and fuel treatment prescriptions to treatment units totaling approximately 5,057 acres. This project is part of the Herger-Feinstein Quincy Library Group Forest Recovery Act Pilot Project. The proposed treatments would take place on the Sierraville Ranger District, and be implemented within the next 5 years.

DATES: Comments concerning the scope of the analysis must be received by November 18, 2005. The Draft Environmental Impact Statement (DEIS) is expected to be completed in March of 2006, and the Final Environmental

Impact Statement (FEIS) is expected to be completed in July of 2006.

ADDRESSES: Send written comments to Jeff Leach, USDA Forest Service, Sierraville Ranger District, P.O. Box 95 (317 South Lincoln), Sierraville, CA 96126, office hours 8 a.m. to 4:30 p.m., Monday-Friday; telephone (530) 994-3401; FAX (530) 994-3143; e-mail: *comments-pacificsouthwest-tahoe-sierraville@fs.fed.us*.

FOR FURTHER INFORMATION CONTACT: Jeff Leach or Timothy Evans at the above addresses and phone number.

SUPPLEMENTARY INFORMATION: As part of the HFQLG Act Pilot Project, the Sierraville District completed the planning and NEPA environmental analysis for the Euro and Checkmate Projects. The District Ranger signed the Decision Notice for the Euro Project on May 2, 2005, and the Decision Notice of the Checkmate Project on June 7, 2005. Four Notices of Appeal were filed on the Euro Project Decision. Because of an appeal on the Euro Project Decision by the Lahontan Region of the California Regional Water Quality Control Board, and the denial of a Conditional Waiver of Discharge Requirements for Discharges Related to Timber Harvest Activities by the Central Valley Region, both the Euro and Checkmate Project Decisions were withdrawn on June 28, 2005. Since that time, four public field trips took place to review some of the treatments of both the Euro and Checkmate projects. Participants in at least one of these field trips included representatives from both the Lahontan and Central Valley Regions of the California Water Control Board, representatives of some of the organizations that filed appeals of the Euro Decision, and members of the interested public, including representatives of the Quincy Library Group. After considering the discussions that took place on these field trips, the Sierraville District Ranger decided to combine the Euro and Checkmate Projects into one proposed action (now titled the Phoenix Project) and to issue this Notice of Intent to prepare an EIS.

Purpose and Need for Action

The Phoenix Project is being proposed to implement the Herger-Feinstein Quincy Library Group Forest Recovery Act of October 12, 1998 (HFQLG). The underlying need for the pilot project is to fulfill the Secretary of Agriculture's statutory duty under the HFQLG Act, to the extent consistent with applicable Federal Law. That duty is to test and demonstrate the effectiveness of certain resource management activities

designed to meet ecologic, economic, and fuel reduction objectives on the Lassen and Plumas National Forests and Sierraville District of the Tahoe National Forest. The Act requires the Secretary to conduct a pilot project for a period of up to 5 years (recently extended through 2009). To accomplish the purpose of the Act, resource management activities are required, including construction of a strategic system of Defensible Fuel Profile Zones (DFPZs), group selection harvest and individual tree selection harvest, and riparian management (watershed restoration) projects. The Act directs the Forest Service to construct 40,000 to 60,000 acres of DFPZs each year. The objectives of the Phoenix Project are:

1. To reduce negative effects from catastrophic wildfire on National Forest, private and state lands, and local communities.

2. To create a safer, more effective fire suppression environment and provide connecting links to existing fuelbreaks.

3. To create the pre-conditions necessary for reintroduction of low intensity fire to the ecosystem, thereby beginning the process of restoring fire to its natural role in the ecology of the project area.

4. To improve timber stand health, vigor, and resistance to fire, insects, and disease.

5. Implement riparian management to restore the health and vigor of aspen stands.

6. To protect and improve habitat for Threatened, Endangered, and Sensitive Species, and Management Indicator Species, both plant and animal.

7. To generate economic activity, income and employment in support of rural community stability.

Proposed Action

1. Implement mechanical thinning from below on approximately 2,657 acres. The thinning prescription would be designed to retain all live trees greater than or equal to 30 inches DBH.

2. Implement group selection harvest with groups less than or equal to 2.0 acres in size, on approximately 390 acres.

3. Implement aspen restoration on approximately 217 acres. Conifers would be removed to a 40-inch diameter limit in areas where conifers are crowding out aspen trees.

4. Implement hand thinning and piling on approximately 991 acres. The hand thinning would thin from below to an upper diameter limit of less than or equal to 10 inches DBH.

5. Implement thinning by mechanical mastication of brush and saplings on approximately 802 acres of young
