SUPPLEMENTARY INFORMATION: The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and the assumptions used;
- Propose ways to enhance the quality, utility, and clarity of the information to be collected; and
- Propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Comments: A 60-day **Federal Register** notice for the My Improvement Plan: On-line Survey and Planning Tool for Training and Technical Assistance (T/TA) was published on March 14, 2005. The comment period ended on May 14, 2005. No comments were received.

Description: The Corporation is seeking approval of the *My Improvement Plan: An On-line Survey and Planning Tool for T/TA*. The purpose of this tool is to strengthen the capacities of grantees to manage their programs and deliver services effectively. This tool will cost-effectively develop program and project

core management competencies (such as, financial and grants management, resource and fund development, performance measurement and evaluation, etc.). My Improvement Plan will enable program officers and T/TA providers to assess users' needs, target, and deliver T/TA to users.

The tool will be published by the Corporation's Office of Leadership Development and Training on its website www.nationalservice.gov/resources. The tool's questions will be voluntarily completed by the Corporation's grantees, other service organizations and interested members of the public. Based on their responses, users will be directed to specific training and technical resources most beneficial to their professional development in the form of an individualized learning plan ("My Improvement Plan").

The survey tool includes a pre-screening block consisting of 36 questions and 10 building blocks consisting of between 12 and 42 questions. Users of the tool may opt to take one or all of the building blocks. This tool will be completed electronically using the Corporation's training and technical assistance Web site, www.nationalservice.gov/resources.

POLICY JUSTIFICATION**Spain – AEGIS Weapons System**

The Government of Spain has requested a possible sale of

Major Defense Equipment (MDE)

**1 MK 7 AEGIS Weapons System;
1 MK 41 Baseline VII Vertical Launch System; and
2 MK 45 MOD 1 Gun Mount (1 ship sets) (Excess Defense Articles)**

Non-MDE

**AN/SLQ-25A Torpedo Countermeasure System;
Aviation Support System;
MK III Shipboard System Light Airborne Multi-Purpose System;
Common Data Link Management System/Joint Tactical Information Distribution System;
Multifunctional Information Distribution System on Ships;
MK 162 MOD 1 Shipboard Gridlock System;
Navigation Sensor System Interface/Global Positioning System;
HARPOON ORDALTS to upgrade Spanish HARPOON System.**

Also included are system integration and testing, communications and support equipment, testing, computer programs and maintenance support, ship integration, spare and repair parts, supply support, publications and technical data, training, U.S. Government and contractor technical assistance, and other related elements of logistics support. The estimated cost is \$550 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Spain and enhancing standardization and interoperability with U.S. forces. This proposed sale of the AEGIS Weapon System will provide greater interoperability and cooperation between our navies.

The proposed sale of the AEGIS Weapons System to Spain will contribute to U.S. security objectives by providing a coalition partner with significantly improved Air Warfare capability. This will improve the Spanish Navy's ability to participate in coalition operations, provides common logistical support with the U.S. Navy, and enhances the lethality of its new frigate program. The Spanish can easily integrate the capabilities of the AEGIS Weapons System into their concept of operations. Spain will have no difficulty absorbing this system into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principle contractors will be:

Lockheed-Martin Maritime System and Sensors	Moorestown, New Jersey
Raytheon Company, Equipment Division	Andover, Massachusetts
General Dynamics, Armament Systems	Burlington, Vermont
Lockheed Martin Maritime Systems and Sensors	Eagan, Minnesota

Offset agreements associated with this proposed sale are expected, but at this time the specific offset agreements are undetermined and will be defined in negotiations between the purchaser and contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Spain.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 06-16

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act**

**Annex
Item No. vii**

(vii) Sensitivity of Technology:

1. The AEGIS Weapon System (AWS) hardware is **Unclassified**, with the exception of the Radio Frequency oscillator used in the Fire Control transmitter; which is classified **Confidential**. AEGIS documentation in general is **Unclassified**; however, seven operation and maintenance manuals are classified **Confidential**, and one AEGIS maintenance manual supplement is classified **Secret**. The manuals and technical documents are limited to those necessary for operational and organizational maintenance.

2. While the hardware associated with the SPY-1D(V) radar is **Unclassified**, the computer programs are classified **Secret**. It is the combination of the SPY-1D(V) hardware and the computer programs that constitutes the sensitive technology aspects. The SPY-1D(V) radar hardware design and production data will not be released with this proposed sale. Some computer program documentation at the **Secret** level explaining the capabilities of the systems will be released to support Spanish understanding of US computer program development efforts.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or could be used in the development of a system with similar or advanced capabilities.
