

Identification, Preservation, and Continued Access to Permanently Valuable Electronic Records

To ensure the identification, preservation, and continued access to Government information on the Internet and to other electronic records, NARA will develop policy for managing¹ permanent or potentially permanent electronic records generated in Federal agencies.

In addition to developing the tools outlined above and continuing general work on NARA regulations and guidance, NARA will develop:

- Concise, public-use versions of criteria in NARA 1441, Appraisal Policy

of the National Archives and Records Administration.

- Concise articulations of NARA's permanent records priorities based on our governmentwide resource allocation results, identifying the Federal Enterprise Architecture, Business Reference Model, Services to Citizens areas (Lines of Business) that NARA is most concerned with.

- Self-analysis checklists for Federal agencies to use to identify and report on:

(a) The major government information systems resources that they are responsible for that generate permanent

or potentially permanent electronic records; and

(b) The general, high-level technical requirements Federal agencies must meet to manage their permanent or potentially permanent electronic records.

The agency self-analysis would include the NARA 1441 and the resource allocation criteria, as well as technical evaluation based on the Records Management Profile.

These tools will allow agencies to help Federal agencies and NARA identify and manage the electronic records that need to be preserved for access and use by future generations.

TIMELINE FOR ACTION

Date required	Responsible party (Federal agencies or NARA)	Required actions
Ongoing	Federal Agencies	Federal agencies are already required to: <ul style="list-style-type: none"> • Implement processes and procedures to manage electronic records in existing agency systems; • Transfer to NARA permanent electronic records from existing or legacy systems according to approved records schedules; • Identify, schedule, and transfer to NARA permanent or potentially permanent electronic records from existing or legacy systems. By September 30, 2009, agencies must have NARA-approved records schedules covering all existing (as of December 17, 2005) electronic records systems.
Ongoing	Federal Agencies	Federal agencies must build records management capabilities into all newly developed systems that generate Federal records, specifically including functionalities to identify and transfer to NARA records of permanent or potentially permanent value.
By FY 2008 (October 1, 2007)	NARA	NARA will: <ul style="list-style-type: none"> • Articulate specifications for agencies to use to ensure the solutions professional and IT service providers sell to Federal agencies meet statutory and regulatory Federal records management requirements; and • Promulgate additional guidance and best practices for Federal agencies to identify, schedule, and transfer to NARA permanent or potentially permanent electronic records from existing or legacy systems.

NATIONAL SCIENCE FOUNDATION

Notice of Availability of Draft Environmental Assessment for the Very Energetic Radiation Imaging Telescope Array System (Veritas)

AGENCIES: National Science Foundation (Lead Agency) and the U.S. Department of Energy (Cooperating Agency With Jurisdiction).

ACTION: Notice of availability.

SUMMARY: This notice announces the availability, and opportunity for public review and comment, of the environmental assessment (EA) that

supports the National Science Foundation (NSF) and U.S. Department of Energy (DOE) proposal to authorize the continued expenditure of grant funds totaling \$12.3 million by the Smithsonian Institution to construct a four-telescope array near Tucson, Arizona. The draft EA is available at <http://veritas.sao.arizona.edu/>.

DATES: Comments should be received by the Agencies' third-party contractor, SWCA Environmental Consultants, no later than December 9, 2005.

ADDRESSES: Comments, or requests for copies of the draft EA, should be sent to: Tom Furgason, Project Manager, SWCA Environmental Consultants, 343 West Franklin Street, Tucson, AZ 85701.

Requests for copies of the draft EA may also be made by calling (520) 325-

9194. Comments may be mailed to the address above or sent via facsimile at (520) 325-2003.

SUPPLEMENTARY INFORMATION: The NSF and DOE propose to authorize the continued expenditure of grant funds totaling \$12.3 million by the Smithsonian Institution to construct a four-telescope array near Tucson, Arizona. The proposed telescopes and ancillary facilities are known as the Very Energetic Radiation Imaging Telescope Array System (VERITAS). The purpose of the proposed project would be to provide the ground-based capability to study extremely energetic gamma rays potentially produced from a variety of astrophysical sources. VERITAS would permit researchers to study the

properties of the sources of these gamma rays.

VERITAS would consist of an array of four identical telescopes, and ancillary facilities such as control building, communications links, and an access road with underground utilities. The preferred alternative site for VERITAS is a 10-hectare (25-acre) parcel in an area located west of the top of Kitt Peak in Horsehoe Canyon. The proposed project area is within the Kitt Peak National Observatory (KPNO) area leased by NSF from the Tohono O'odham Nation. A 4-hectare (10-acre) site known as Montosa Canyon, located in the Coronado National Forest in southern Arizona, is also evaluated as an alternative site. Under the no action alternative, NSF and DOE would make no further funds available for the construction of the VERITAS project.

Issued in Arlington, VA.

Lawrence Rudolph,

General Counsel, National Science Foundation.
