

amendments to the section, only the revised rule text and additional guidance was included. Therefore, when looking for all the guidance related to a regulatory section at a recent amendment level, the reader must go through all of the amendment levels for that section. The same applies to determining the entire text for any regulatory section, e.g., § 25.807.

Therefore, this proposed AC 25-17A revision provides, for each crashworthiness section, the complete regulatory text and associated guidance for each relevant amendment, in chronological order. Those paragraphs changed by the amendment are enclosed within []. At the end of each guidance paragraph, the first applicable amendment level is given within ().

Including the complete regulation at each amendment level; all of the guidance material at each amendment level, including guidance from Amendments 25-1 through 25-112; and all of the new appendices, results in the document increasing to about 860 pages. The existing AC 25-17 includes guidance from Amendments 25-1 through 25-59 (approximately one-half the number of amendments) and is 198 pages. Compared with the total size of this proposed AC 25-17A revision, the amount of changes is very small.

To assist in reviewing the proposed AC, the FAA identifies the additions/changes made to the guidance by highlighting the text changes the first time they appear. The baseline for identifying the changes to the guidance is the existing AC 25-17, dated 7/15/91. The additions/changes are broken down into four categories, each represented in a different highlight color. Minor changes to improve clarity, understanding, and grammar are not highlighted.

The categories and colors are:

- Yellow highlight text (Yellow highlight)—Additions/changes to the guidance included in the 1999 version of the AC that was published for comment AND the changes made as the result of public comments received on that draft AC.

- Green highlight text—Additions/changes to the guidance that have been through the FAA policy development process.

- Blue highlight text—Additions/changes to the guidance made as the result of a change in the regulations.

- Purple highlight text—Additions/changes to the guidance that are new, and have not been through the public process.

Reviewers of the draft AC are encouraged to focus their attention on the highlighted text, which represents

the revised or new guidance compared to the existing released version of this AC. However, if comments are received on guidance that is in AC 25-17, they will be reviewed and considered as well.

The methods and procedures described in this proposed AC revision have evolved over many years. This proposed AC revision represents one acceptable means, but not the only means, of compliance pertinent to the associated requirements at the indicated amendment levels.

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2005-22660]

Hours of Service of Drivers: United States Postal Service Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that it has received an application for exemption from the hours-of-service (HOS) requirements from the United States Postal Service (USPS) on behalf of motor carriers that transport mail under contract for USPS. USPS requests that some of its contract motor carriers be allowed to operate under the HOS rules in effect prior to January 4, 2004. USPS believes the exemption would likely achieve a level of safety equivalent to, or greater than, the level achieved under the HOS rules applicable to operators of property-carrying vehicles rules after January 4, 2004. FMCSA requests public comment on the USPS application for exemption.

DATES: Comments must be received on or before December 16, 2005.

ADDRESSES: You may submit comments identified by DOT DMS Docket Number FMCSA-2005-22660 using any of the following methods:
