Discussion

We proposed to amend 14 CFR part 39 with a notice of proposed rulemaking (NPRM) for an AD for certain Boeing Model 727–200 and 727–200F series airplanes; 737–200, 737–200C, 737–300, and 737–400 series airplanes; 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747SR, and 747SP series airplanes; 757–200 and 757–200PF series airplanes; and 767–200 and 767–300

series airplanes. The NPRM was published in the **Federal Register** on June 6, 2005 (70 FR 32738). The NPRM proposed to require replacing any insulation blanket constructed of AN–26 with a new insulation blanket. The NPRM action invites comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD.

Actions Since NPRM Was Issued

Since we issued the NPRM, we have received many comments. Most commenters express concerns about the unavailability of appropriate service information and the limited number of compliance methods. In addition, several commenters suggest alternative methods of compliance, but do not provide any specific details.

It is our intent to address the identified unsafe condition in a timely manner, with minimum disruption to industry, and maximum flexibility in methods of compliance. We encourage interested parties to continue to evaluate the proposal and to submit additional comments with more specific details concerning issues that the FAA may need to evaluate before finalizing its decision of the proposal. We have determined that such input may be beneficial before adoption of a final rule. As a result, we have decided to reopen the comment period for 90 days to receive additional comments.

No part of the regulatory information has been changed; therefore, the NPRM is not republished in the **Federal Register**.

Comments Due Date

We must receive comments on this AD action by February 21, 2006.

Issued in Renton, Washington, on November 10, 2005.
