Decision on the Proposed Amendment

The statute and the implementing regulation state that PBGC must make two factual determinations before it approves a request for an amendment that adopts a special withdrawal liability rule. ERISA section 4203(f); 29 CFR 4203.4(a). First, on the basis of a showing by the plan, PBGC must determine that the amendment will apply to an industry that has characteristics that would make use of the special rules appropriate. Second, PBGC must determine that the plan amendment will not pose a significant risk to the insurance system. PBGC's discussion on each of those issues follows. After review of the record submitted by the Plan, and having received no public comments, PBGC has entered the following determinations.

1. What Is the Nature of the Industry?

In determining whether an industry has the characteristics that would make an amendment to special rules appropriate, an important line of inquiry is the extent to which the Plan's contribution base resembles that found in the construction industry. This threshold question requires consideration of the effect of employer withdrawals on the Plan's contribution base.

Work covered by this plan must be performed at the office building located in Chicago. Thus, the work is local in nature; it generally will continue to be covered by the Plan. An employer ceases contributing when work is outsourced, the contractor loses a cleaning or security contract with a building owner, bankruptcy, closeout of a business as a result of retirement, or business relocation. Over the past ten years, cessation of contributions by any individual employer has not had an adverse impact on the Plan's contribution base. Most employers that have ceased to contribute have been replaced by another employer who begins contributing for the same work.

2. What Is the Exposure and Risk of Loss to PBGC and Participants?

Exposure. The bargaining parties have increased benefits for active workers by just over 25% since 1999. For a

participant who retires with 25 years of service (the maximum) the monthly benefit has risen from \$538 to \$675. Thus, benefit liabilities will rise because recent retirees will have higher benefits.

Risk of loss. The record shows that the Plan presented a low risk of loss to PBGC guaranty funds. The Plan's active participant population is increasing. Plan assets increased from 1997 to 2000, and dipped slightly after that. While no longer fully funded for accrued or vested benefits, underfunding decreased in 2003. The Plan and the covered industry have unique characteristics that suggest that the Plan's contribution base is likely to remain stable. Contributions to the Plan are made with respect to Chicago commercial office buildings. Consequently, the Plan's contribution base is secure and the departure of one employer from the Plan is not likely to have an adverse effect on the contribution base so long as the number of buildings covered does not decline.

Conclusion

Based on the facts of this case and the representations and statements made in connection with the request for approval, PBGC has determined that the plan amendment modifying special withdrawal liability rules (1) will apply only to an industry that has characteristics that would make the use of special withdrawal liability rules appropriate, and (2) will not pose a significant risk to the insurance system. Therefore, PBGC hereby grants the Plan's request for approval of a plan amendment modifying special withdrawal liability rules, as set forth herein. Should the Plan wish to amend these rules at any time, PBGC approval of the amendment will be required.
