3. AMFIRE Mining Company, LLC

[Docket No. M-2005-075-C]

AMFIRE Mining Company, LLC, P.O. Box 157, Clymer, Pennsylvania 15728 has filed a petition to modify the application of 30 CFR 75.1710-1 (Canopies or cabs; self-propelled diesel-powered and electric face equipment; installation requirements) to its Nolo Mine (MSHA I.D. No. 36-08850) located in Indiana County, Pennsylvania. The petitioner proposes to operate self-propelled electric face equipment without cabs and canopies in coal seams of 48" or less. The petitioner asserts that using cabs and canopies on the equipment in areas of 48' or less results in a diminution of safety causing the roof support to be dislodged. In addition, the operator's visibility is decreased which poses a hazardous situation to persons traveling on foot. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

BILLING CODE 7590-01-M

NUCLEAR REGULATORY COMMISSION

State of Minnesota: NRC Draft Staff Assessment of a Proposed Agreement Between the Nuclear Regulatory Commission and the State of Minnesota

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of a Proposed Agreement with the State of Minnesota.

SUMMARY: By letter dated July 6, 2004, Governor Tim Pawlenty of Minnesota requested that the U.S. Nuclear Regulatory Commission (NRC) enter into an Agreement with the State as authorized by Section 274 of the Atomic Energy Act of 1954, as amended (Act).

Under the proposed Agreement, the Commission would discontinue, and

Minnesota would assume, portions of the Commission's regulatory authority exercised within the State. As required by the Act, NRC is publishing the proposed Agreement for public comment. NRC is also publishing the summary of a Draft Staff Assessment of the Minnesota Program. Comments are requested on the proposed Agreement and the NRC Draft Staff Assessment which finds the Program adequate to protect public health and safety and compatible with NRC's program for regulation of agreement material.

The proposed Agreement would release (exempt) persons who possess or use certain radioactive materials in Minnesota from portions of the Commission's regulatory authority. The Act requires that NRC publish those exemptions. Notice is hereby given that the pertinent exemptions have been previously published in the **Federal Register** and are codified in the Commission's regulations as 10 CFR part 150.

DATES: The comment period expires December 9, 2005. Comments received after this date will be considered if it is practical to do so, but the Commission cannot assure consideration of comments received after the expiration date.

ADDRESSES: Written comments may be submitted to Mr. Michael T. Lesar, Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, Washington, DC 20555-0001. Comments may be submitted electronically at nrcprep@nrc.gov.

The NRC maintains an Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. The documents may be accessed through the NRC's Public Electronic Reading Room on the Internet at <http://www.nrc.gov/reading-rm/adams.html>. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) reference staff at (800) 397-4209, or (301) 415-4737, or by e-mail to pdr@nrc.gov.

Copies of comments received by NRC may be examined at the NRC Public Document Room, 11555 Rockville Pike, Public File Area O-1-F21, Rockville, Maryland. Copies of the request for an Agreement by the Governor of Minnesota including all information and documentation submitted in support of the request, and copies of the full text of the NRC Draft Staff Assessment are also available for public inspection in the NRC's Public

Document Room—ADAMS Accession Numbers: ML041960496, ML041960499, ML052440344, ML050130375, ML050140452, ML051330043, ML051740384, ML051650073, ML052200424, and ML053060372.

FOR FURTHER INFORMATION CONTACT: Cardelia Maupin, Office of State and Tribal Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Telephone (301) 415-3340 or e-mail CHM1@nrc.gov.

SUPPLEMENTARY INFORMATION: Since section 274 of the Act was added in 1959, the Commission has entered into Agreements with 33 States. The Agreement States currently regulate approximately 17,200 agreement material licenses, while NRC regulates approximately 4,700 licenses. Under the proposed Agreement, approximately 167 NRC licenses will transfer to Minnesota. NRC periodically reviews the performance of the Agreement States to assure compliance with the provisions of section 274.

Section 274e requires that the terms of the proposed Agreement be published in the **Federal Register** for public comment once each week for four consecutive weeks. This Notice is being published in fulfillment of the requirement.

I. Background

(a) Section 274d of the Act provides the mechanism for a State to assume regulatory authority, from the NRC, over certain radioactive materials¹ and activities that involve use of the materials.

In a letter dated July 6, 2004, Governor Pawlenty certified that the State of Minnesota has a program for the control of radiation hazards that is adequate to protect public health and safety within Minnesota for the materials and activities specified in the proposed Agreement, and that the State desires to assume regulatory responsibility for these materials and activities. Included with the letter was the text of the proposed Agreement, which is shown in Appendix A to this Notice.

The radioactive materials and activities (which together are usually referred to as the "categories of materials") which the State of Minnesota requests authority over are: (1) The possession and use of byproduct materials as defined in section 11e.(1) of

¹ The radioactive materials are: (a) byproduct materials as defined in section 11e.(1) of the Act; (b) byproduct materials as defined in section 11e.(2) of the Act; (c) source materials as defined in section 11z. of the Act; and (d) special nuclear materials as defined in section 11aa. of the Act, restricted to quantities not sufficient to form a critical mass.
