The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. [Project No. 2984-042]

S.D. Warren Company; Notice of Availability of Final Environmental Assessment

November 29, 2005.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects' staff has reviewed the application for new license for the Eel Weir Project, located at the outlet of Sebago Lake, and has prepared a final Environmental Assessment (EA) for the project. In the final EA, Commission staff analyzed the potential environmental effects of relicensing the project and concludes that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the final EA is available for review in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. [Project No. 2153-012 California]

United Water Conservation District; Notice of Availability of Environmental Assessment

November 28, 2005.

In accordance with the National Environmental Policy Act of 1969, as amended, and Federal Energy Regulatory Commission's (Commission) regulations (18 CFR Part 380), Commission staff reviewed the application for a minor license for the Santa Felicia Hydroelectric Project and prepared this environmental assessment (EA). The project is located on Piru Creek in Ventura County, California. The project occupies 174.5 acres of U.S. land that is administered by the U.S. Department of Agriculture, Forest Service (Forest Service) in the Los Padres and Angeles National Forests.

Specifically, the project licensee, United Water Conservation District, requested Commission approval of the Santa Felicia Project for hydroelectric generation purposes. In the EA, Commission staff analyze the probable environmental effects of relicensing the project and conclude that approval of the project, with appropriate staff-recommended environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in Public Reference Room 2-A of the Commission's offices at 888 First Street, NE., Washington, DC. The EA also may be viewed on the Commission's Internet Web site (<http://www.ferc.gov>) using the "eLibrary" link.
