Office of the Secretary

Veterans' Advisory Board on Dose Reconstruction

AGENCY: Department of Defense, Defense Threat Reduction Agency.

ACTION: Notice of advisory board meeting.

SUMMARY: The Defense Threat Reduction Agency (DTRA) and the Department of Veterans Affairs (VA) will hold the second public meeting of the Veterans' Advisory Board on Dose Reconstruction (VBDR). The VBDR was established at the recommendation of the National Research Council report, entitled "Review of the Dose Reconstruction Program of the Defense Threat Reduction Agency." The report recommended the need to establish an advisory board that will provide suggestions for improvements in dose reconstruction and claim adjudication procedures. The goal of VBDR is to provide guidance and oversight of the dose reconstruction and claims compensation programs for veterans of U.S.-sponsored atmospheric nuclear weapons tests from 1945-1962; veterans of the 1945-1946 occupation of Hiroshima and Nagasaki, Japan; and veterans who were prisoners of war in those regions at the conclusion of World War II. In addition, the advisory board will assist VA and DTRA in communicating with the veterans.

Radiation dose reconstruction has been carried out by the Department of Defense under the Nuclear Test Personnel Review (NTPR) program since the 1970s. DTRA is the executive agent for the NTPR program which provides participation data and actual or estimated radiation dose information to veterans and the VA.

Board members were selected to fulfill the statutory requirements mandated by Congress in Section 601 of Public Law 108-183. The Board was appointed on June 3, 2005, and is comprised of 16 members. Board members were selected to provide expertise in historical dose reconstruction, radiation health matters, risk communications, radiation epidemiology, medicine, quality management, decision analysis and ethics in order to appropriately enable the VBDR to represent and address veterans' concerns.

The Board is governed by the provisions of the Federal Advisory Committee Act (FACA), Public Law 92-463, which sets forth standards for the formation and conduct of government advisory committees.

SUPPLEMENTARY INFORMATION:

- III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. 93–275, 15 U.S.C. 761 et seq.) and the Department of Energy Organization Act (Pub. L. 95–91, 42 U.S.C. 7101 et seq.) require the EIA to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the utility of the information collected, and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) of the collections under section 3507(h) of the Paperwork Reduction Act of 1995.

Appendix C, Form NWPA–830, ‘Delivery Commitment Schedule, (DCS)’ is designed to allow companies purchasing nuclear waste disposal services from the DOE to identify the number of assemblies, including their initial uranium loading, the range of discharge dates, and the mode of transportation, along with the year that the purchaser proposes that the DOE take delivery. This information is required at a point in time at least 63 months before expected transfer to the DOE. The DCS provides purchasers with the opportunity to inform DOE of their plans for utilizing their allocations of projected Federal Waste Management
