NUCLEAR REGULATORY COMMISSION

Proposed Generic Communication Post-Fire Safe-Shutdown Circuit Analysis Spurious Actuations

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of opportunity for public comment. Reopening of comment period.

SUMMARY: On October 19, 2005 (70 FR 60859), the NRC published for public comment a generic letter (GL) to:

(1) Request addressees to review their fire protection program to confirm compliance with existing applicable regulatory requirements regarding their assumptions of the phrase "one-at-a-time" in light of the information provided in this GL and, if appropriate, take additional actions to return to compliance. Specifically, although some licensees have performed their post-fire, safe-shutdown circuit analyses based on an assumption of only a single spurious actuation per fire event or that spurious actuations will occur "one-at-a-time," recent industry cable fire test results demonstrated that these assumptions are not valid.

(2) Require addressees to submit a written response to the NRC in accordance with NRC regulations in Title 10 of the Code of Federal Regulations (10 CFR) Section 50.54(f).

The Nuclear Energy Institute (NEI) has requested a 45-day extension of the comment period. NEI believes that additional time will be needed to provide appropriate comments on the draft GL. NEI based its request on the time needed to perform an assessment of the safety significance of multiple sequential and cumulative failures; an evaluation of the industry test results and interviews with the industry project team; an evaluation of the NUREG/CR-6776, and an assessment of the NRC/ licensee documentation associated with the prior NRC staff positions and practices related to safe-shutdown circuit analysis. The NRC has decided to reopen the comment period for an additional 45 days.

This **Federal Register** notice is available through the NRC's Agencywide Documents Access and Management System (ADAMS) under accession number ML051650017.

DATES: The comment period has been extended and now expires February 6, 2006. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSEES: Submit written comments to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Mail Stop T6-D59, Washington, DC 20555-0001, and cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to NRC Headquarters, 11545 Rockville Pike (Room T-6D59), Rockville, Maryland, between 7:30 am and 4:15 pm on Federal workdays.
