## NUCLEAR REGULATORY COMMISSION

### Agency Information Collection Activities: Proposed Collection; Comment Request

**AGENCY:** U.S. Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

**SUMMARY:** The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: Request Non-Agreement States Information for the State Agreements Program, as authorized by Section 274(a) of the Atomic Energy Act.

2. Current OMB approval number: 3150–0200.

3. How often the collection is required: 6 times per year.

4. Who is required or asked to report: The 19 States and territories (17 Non-Agreement States and the District of Columbia and the Commonwealth of Puerto Rico) that have not signed 274(b) Agreement with NRC.

5. The number of annual respondents: 19.

6. The number of hours needed annually to complete the requirement or request: 941.

7. Abstract: Requests may be made of Non-Agreement States that are similar to those of Agreement States to provide a more complete overview of the national program for regulating radioactive materials. This information would be used in the decision-making of the Commission. With Agreement States and as part of the NRC cooperative post-agreement program with the States pursuant to Section 274(b), information on licensing and inspection practices, and/or incidents, and other technical and statistical information are exchanged.

Agreement State comments are also solicited in the areas of proposed implementing procedures relative to NRC Agreement State program policies. With the enactment of the Energy Policy Act of 2005, specifically Section 651(e), NRC now has regulatory authority over use of accelerator-produced radioactive materials and discrete sources of radium-226 and other naturally occurring radioactive material as specified by the Commission. Therefore, information requests sought may take the form of surveys, e.g., telephonic and electronic surveys/polls and facsimiles.

Submit, by February 27, 2006, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F21, Rockville, Maryland 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Brenda Jo. Shelton (T–5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, by telephone at 301–415–7233, or by Internet electronic mail to [infocollects@nrc.gov](mailto:infocollects@nrc.gov).

Dated at Rockville, Maryland, this 21st day of December 2005.
