National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Cans

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; amendments.

SUMMARY: On November 13, 2003, EPA issued national emission standards for hazardous air pollutants (NESHAP) for surface coating of metal cans under section 112 of the Clean Air Act (CAA). This action proposes to amend the final rule to correct errors and clarify sections of the rule.

In the Rules and Regulations section of this **Federal Register**, we are taking direct final action on the proposed amendments because we view the amendments as noncontroversial and anticipate no adverse comments. We have explained our reasons for the amendments in the preamble to the direct final rule. If we receive no adverse comments, the changes set forth in the direct final action will become effective and we will take no further action on the proposed amendments. If we receive adverse comment on one or more distinct amendments, we will publish a timely withdrawal in the **Federal Register** indicating which amendments in the direct final rule will become effective and which amendments are being withdrawn due to adverse comment. If part or all of the direct final rule in the Rules and Regulations section of today's **Federal Register** is withdrawn, all comments pertaining to the amendments will be addressed in a subsequent final rule based on these proposed amendments. We will not institute a second comment period on the subsequent final rule. Any parties interested in commenting must do so at this time.

DATES: *Comments.* Written comments must be received on or before February 6, 2006 unless a public hearing is requested. If requested by January 23, 2006, a hearing will be held on February 6, 2006 and the comment period will be extended until March 7, 2006.

Statutory and Executive Order Reviews

For a complete discussion of all of the administrative requirements applicable to this action, see the direct final rule in the Rules and Regulations section of today's **Federal Register**.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impact of today's technical amendments on small entities, a small entity is defined as: (1) A small business ranging from 500 to 1,000 employees as defined by the Small Business Administration's size standards; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today's proposed rule amendments on small entities, I certify that the proposed rule amendments will not have a significant economic impact on a substantial number of small entities. The proposed rule amendments will not impose any new requirements on small entities. We continue to be interested in the potential impacts of the proposed rule on small entities and welcome comments on issues related to such impacts.

For information regarding other administrative requirements for this action, please see the direct final rule action that is located in the Rules and Regulations section of this **Federal Register**.
