

The revisions and addition read as follows:

§ 21.7540 Eligibility for educational assistance.

(a) *Basic eligibility requirements.* A reservist must meet the requirements for a secondary school diploma (or an equivalency certificate) before applying for educational assistance. VA will decide whether a reservist met those requirements before applying for educational assistance. If the reservist applies before completing the requirements, VA will disallow the application. A reservist's premature application will not prevent the reservist from establishing eligibility at a later time by applying for educational assistance again after having completed the academic requirements. The Armed Forces will decide whether a reservist has met all the other eligibility criteria needed in order to receive educational assistance pursuant to 10 U.S.C. chapter 1606. To be eligible a reservist:

(5) Must have met the requirements for a secondary school diploma (or an equivalency certificate) before applying for educational assistance.

Alcohol and Drug Testing: Determination of Minimum Random Testing Rates for 2006

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Notice of determination.

SUMMARY: Using data from Management Information System annual reports, FRA has determined that the 2004 rail industry random testing positive rate was 0.94 percent for drugs and 0.18 percent for alcohol. Since the industry-wide random drug testing positive rate has remained below 1.0 percent for the last two years, the Federal Railroad Administrator (Administrator) has determined that the minimum annual random drug testing rate for the period January 1, 2006, through December 31, 2006, will remain at 25 percent of covered railroad employees. Since the random alcohol testing violation rate has remained below 0.5 percent for the last two years, the Administrator has determined that the minimum random alcohol testing rate will remain at 10 percent of covered railroad employees for the period January 1, 2006, through December 31, 2006.

DATES: This document is effective upon publication.

SUPPLEMENTARY INFORMATION:

Administrator's Determination of 2006 Minimum Random Drug and Alcohol Testing Rates

In a final rule published on December 2, 1994 (59 FR 62218), FRA announced that it will set future minimum random drug and alcohol testing rates according to the rail industry's overall positive rate, which is determined using annual railroad drug and alcohol program data taken from FRA's Management Information System. Based on this data, the Administrator publishes a **Federal Register** notice each year, announcing the minimum random drug and alcohol testing rates for the following year (see 49 CFR 219.602, 219.608).

Under this performance-based system, FRA may lower the minimum random drug testing rate to 25 percent whenever the industry-wide random drug positive rate is less than 1.0 percent for two calendar years while testing at a 50 percent minimum rate. (For both drugs

and alcohol, FRA reserves the right to consider other factors, such as the number of positives in its post-accident testing program, before deciding whether to lower annual minimum random testing rates). FRA will return the rate to 50 percent if the industry-wide random drug positive rate is 1.0 percent or higher in any subsequent calendar year.

For random alcohol testing, if the industry-wide violation rate is less than 1.0 percent but greater than 0.5 percent, the minimum random alcohol testing rate will be 25 percent. FRA will raise the rate to 50 percent if the industry-wide violation rate is 1.0 percent or higher in any subsequent calendar year. FRA may lower the rate to 10 percent whenever the industry-wide violation rate is less than 0.5 percent for two calendar years while testing at a higher rate.

In this notice, FRA announces that the minimum random drug testing rate will

remain at 25 percent of covered railroad employees for the period January 1, 2006, through December 31, 2006, because the industry random drug testing positive rate was below 1.0 percent for the last two years (.094 in 2004 and .093 in 2003). The minimum random alcohol testing rate will remain at 10 percent of covered railroad employees for the period January 1, 2006, through December 31, 2006, because the industry-wide violation rate for alcohol has remained below 0.5 percent for the last two years (.018 in 2003 and 2004). Railroads remain free, as always, to conduct random testing at higher rates.

Issued in Washington, DC on December 30, 2005.

Joseph H. Boardman,
Administrator.
