I. Introduction

Pursuant to 10 CFR 2.106, the Nuclear Regulatory Commission (NRC) is providing notice of the issuance of License Amendment 19 to Material License No. 42-23539-01AF to Department of the Air Force, to authorize the release of four OT-10 training sites at Kirtland Air Force Base, Albuquerque, New Mexico for unrestricted use. The Department of the Air Force's request for an amendment to authorize decommissioning of its four OT-10 training sites was previously notice in the **Federal Register** on June 22, 2001 (66 FR 33579) with a notice of an opportunity to request a hearing.

The Department of the Air Force provided a final radiological status survey report to demonstrate the OT-10 site meets the license termination criteria in Subpart E of 10 CFR Part 20. In addition, NRC staff conducted independent radiological measurements of soils and surfaces at the site. The NRC staff has evaluated the Department of the Air Force's request, reviewed the results of the final radiological survey, and determined that the four OT-10 training sites: TS5, TS6, TS7, and TS8, including building 28010 but excluding building 28005, meet the unrestricted use dose criteria in 10 CFR 20.1402. The Commission has concluded that the

respective OT-10 training sites as specified, are suitable for release for unrestricted use.

This license amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and NRC's rules and regulations set forth in 10 CFR Chapter 1. Accordingly, this license amendment was issued on December 12, 2005, and is effective immediately.

II. Further Information

The NRC has prepared a Final Safety Evaluation Report (SER), December 2005, which documents the information that was reviewed and NRC's conclusion. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," details with respect to this action, including the SER and accompanying documentation included in the license amendment package, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you may access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. Calvert Cliffs Nuclear Power Plant, Inc.; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (NRC or the Commission) has granted the request of Calvert Cliffs

Nuclear Power Plant, Inc. (the licensee) to withdraw its application dated October 14, 2003, for a proposed amendment to Renewed Facility Operating License Nos. DPR-53 and DPR-69 for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, respectively, located in Calvert County, Maryland.

The proposed amendment would have revised the Technical Specifications to change the frequency of surveillance testing for some engineered safety features components.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on November 25, 2003 (68 FR 66133). However, by letter dated December 19, 2005, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated October 14, 2003, and the licensee's letter dated December 19, 2005, which withdrew the application for the license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O-1F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly-available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. SUPPLEMENTARY INFORMATION:

Variable-Rate Premiums

Section 4006(a)(3)(E)(iii)(II) of the Employee Retirement Income Security Act of 1974 (ERISA) and § 4006.4(b)(1) of the PBGC's regulation on Premium Rates (29 CFR part 4006) prescribe use of an assumed interest rate (the "required interest rate") in determining a single-employer plan's variable-rate premium. The required interest rate is the "applicable percentage" (currently 85 percent) of the annual yield on 30-year Treasury securities for the month preceding the beginning of the plan year for which premiums are being paid (the "premium payment year"). (Although the Treasury Department has ceased issuing 30-year securities, the Internal Revenue Service announces a surrogate yield figure each month—based on the 30-year Treasury bond maturing in February 2031—which the PBGC uses to determine the required interest rate.) The required interest rate to be used in determining variable-rate premiums for premium payment years beginning in January 2006 is 3.95 percent (*i.e.*, 85 percent of the 4.65 percent Treasury Securities Rate for December 2005).

The Pension Funding Equity Act of 2004 ("PFEA")—under which the required interest rate is 85 percent of the annual rate of interest determined by the Secretary of the Treasury on amounts invested conservatively in long-term investment grade corporate bonds for the month preceding the beginning of the plan year for which premiums are being paid—applies only for premium payment years beginning in 2004 or 2005. Congress is considering legislation that would extend the PFEA

rate for one more year. If legislation that changes the rules for determining the required interest rate for plan years beginning in January 2006 is adopted, the PBGC will promptly publish a **Federal Register** notice with the new rate.

The following table lists the required interest rates to be used in determining variable-rate premiums for premium payment years beginning between February 2005 and January 2006.

For premium payment years beginning in:	The required interest rate is:
February 2005	4.66
March 2005	4.56
April 2005	4.78
May 2005	4.72
June 2005	4.60
July 2005	4.47
August 2005	4.56
September 2005	4.61
October 2005	4.62
November 2005	4.83
December 2005	4.91
January 2006	3.95

Late Premium Payments; Underpayments and Overpayments of Single-Employer Plan Termination Liability

Section 4007(b) of ERISA and § 4007.7(a) of the PBGC's regulation on Payment of Premiums (29 CFR part 4007) require the payment of interest on late premium payments at the rate established under section 6601 of the Internal Revenue Code. Similarly, § 4062.7 of the PBGC's regulation on Liability for Termination of Single-Employer Plans (29 CFR part 4062) requires that interest be charged or credited at the section 6601 rate on underpayments and overpayments of employer liability under section 4062 of ERISA. The section 6601 rate is established periodically (currently quarterly) by the Internal Revenue Service. The rate applicable to the first quarter (January through March) of 2006, as announced by the IRS, is 7 percent.

The following table lists the late payment interest rates for premiums and employer liability for the specified time periods:

From	Through	Interest rate (percent)
