*VIII. Other Information*

**1. Anticipated Deadlines and Milestones for FY 2007 Competitive Grants**

Beginning in FY 2007, the schedule for submitting work plans and awarding section 319 competitive grants will be modified to expedite the grant awards process. These modifications are intended to ensure that award decisions are made earlier in the fiscal year to provide adequate time for Tribes to implement work plans within the applicable fiscal year. The following estimated dates are provided in order to assist Tribes in planning for EPA's FY 2007 funding cycle for competitive grants:

Date for Tribes to be eligible for 319 grants. October 13, 2006.

Tribes submit competitive grant proposals. December 1, 2006 (anticipated).

Headquarters notifies Regions/Tribes of selections. March 5, 2007 (anticipated).

Tribes submit final grant application to Region. April 5, 2007 (anticipated).

Other than the date EPA will use to determine eligibility to receive 319 grants, the dates above are the anticipated dates for those actions.

**2. Right to Reject All Proposals**

EPA reserves the right to reject all proposals or applications and make no award as a result of this announcement. The EPA Grant Award Officer is the only official that can bind the Agency to the expenditure of funds for selected projects resulting from this announcement.

**Attachment A—Components of a Watershed-Based Plan**

1. An identification of the causes and sources or groups of similar sources that will need to be controlled to achieve the goal identified in element 3 below. Sources that need to be controlled should be identified at the significant subcategory level with estimates of the extent to which they are present in the watershed (e.g., X number of dairy cattle feedlots needing upgrading, including a rough estimate of the number of cattle per facility; Y acres of row crops needing improved nutrient management or sediment control; or Z linear miles of eroded streambank needing remediation).

2. A description of the NPS management measures that will need to be implemented

to achieve a water quality-based goal described in element 3 below, as well as to achieve other watershed goals identified in the watershed-based plan, and an identification (using a map or a description) of the critical areas which those measures will be needed to implement the plan.

3. An estimate of the water quality-based goals expected to be achieved by implementing the measures described in element 2 above. To the extent possible, estimates should identify specific water quality-based goals, which may incorporate, for example: load reductions; water quality standards for one or more pollutants/uses; NPS total maximum daily load allocations; measurable, in-stream reductions in a pollutant; or improvements in a parameter that indicates stream health (e.g., increases in fish or macroinvertebrate counts). If information is not available to make specific estimates, water quality-based goals may include narrative descriptions and best professional judgment based on existing information.

4. An estimate of the amounts of technical and financial assistance needed, associated costs, and/or the sources and authorities that will be relied upon to implement the plan. As sources of funding, Tribes should consider other relevant Federal, State, local and private funds that may be available to assist in implementing the plan.

5. An information and education component that will be used to enhance public understanding and encourage early and continued participation in selecting, designing, and implementing the NPS management measures that will be implemented.

6. A schedule for implementing the NPS management measures identified in this plan that is reasonably expeditious.

7. A description of interim, measurable milestones for determining whether NPS management measures or other control actions are being implemented.

8. A set of criteria that can be used to determine whether the water quality-based goals are being achieved over time and substantial progress is being made towards attaining water quality-based goals and, if not, the criteria for determining whether the watershed-based plan needs to be revised.

9. A monitoring component to evaluate the effectiveness of the implementation efforts over time, measured against the criteria established under element 8 above.

**SUPPLEMENTARY INFORMATION:**

**A. Need for and Use of the Information Collection**

Section 10(g)(1) of the Federal Home Loan Bank Act (Bank Act) requires the Finance Board to promulgate regulations establishing standards of community investment or service that Federal Home Loan Bank (FHLBank) members must meet in order to maintain access to long-term advances. See 12 U.S.C. 1430(g)(1). In establishing these community support requirements for FHLBank members, the Finance Board must take into account factors such as the FHLBank member's performance under the Community Reinvestment Act of 1977 (CRA), 12 U.S.C. 2901, *et seq.*, and record of lending to first-time homebuyers. 12 U.S.C. 1430(g)(2).

Part 944 of the Finance Board regulations implements section 10(g) of the Bank Act. See 12 CFR part 944. The rule provides uniform community support standards all FHLBank members must meet and review criteria Finance Board staff must apply to determine compliance with section 10(g). More specifically, section 944.2 of the rule (12 CFR 944.2) implements the statutory community support requirement and requires each member selected for review to submit a completed Community Support Statement Form to the Finance Board. A copy of the Community Support Statement Form is attached to this Notice. Section 944.3 (12 CFR 944.3) establishes community support standards for the two statutory factors—CRA and first-time homebuyer performance—and provides guidance to a respondent on how it may satisfy the standards. Sections 944.4 and 944.5 (12 CFR 944.4-5) establish the procedures and criteria the Finance Board uses in determining whether FHLBank members satisfy the statutory and regulatory community support requirements.
