B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

- Describe any assumptions and provide any technical information and/or data that you used.

- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

- Provide specific examples to illustrate your concerns, and suggest alternatives.

- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- Make sure to submit your comments by the comment period deadline identified.

II. What Action is the Agency Taking?
EPA is printing a summary of a pesticide petition received under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or amendment of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that this pesticide petition contains data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petition. Additional data may be needed before EPA rules on this pesticide petition.

Pursuant to 40 CFR 180.7(f), a summary of the petition included in this notice, prepared by the petitioner along with a description of the analytical method available for the detection and measurement of the pesticide chemical residues is available on EPA's Electronic Docket at <http://www.regulations.gov/>. To locate this information on the home page of EPA's Electronic Docket, select "Quick Search" and type the OPP docket ID number. Once the search has located the docket, clicking on the "Docket ID" will bring up a list of all documents in the docket for the pesticide including the petition summary.

Amendment to Existing Tolerance

PP 3E6769. IR-4, 681 U.S. Highway #1 South, North Brunswick, NJ 08902, proposes to amend 40 CFR 180.555 by establishing tolerances for the combined residues of the fungicide trifloxystrobin and the free form of its acid metabolite (CGA-32113) in or on the food commodities barley, grain at 0.05 parts per million (ppm); barley, hay at 0.3 ppm; barley, straw at 5.0 ppm; oat, forage at 0.3 ppm; oat, grain at 0.05 ppm; oat, hay at 0.3 ppm; and oat, straw

at 5.0 ppm. A practical analytical methodology for detecting and measuring levels of trifloxystrobin in or on food commodities has been submitted to the EPA. The limit of detection (LOD) for each analyte of this method is 0.08ng injected, and the limit of quantitation (LOQ) is 0.02 ppm. The method is based on crop specific cleanup procedures and determination by gas chromatography with nitrogen-phosphorus detection.

Amendment to Existing Tolerance

PP 3E6535. IR-4, 681 U.S. Highway #1 South, North Brunswick, NJ 08902, proposes to amend 40 CFR 180.476 by establishing tolerances for the combined residues of the fungicide triflumizole and its metabolites containing the 4-chloro-2-trifluoromethylaniline moiety in or on the food commodity filberts at 0.05 parts per million (ppm). The analytical method is suitable for analyzing crops for residues of triflumizole and its aniline containing metabolites at the proposed tolerance levels. The analytical method has been independently validated. Residue levels of triflumizole are converted to FA-1-1 by acidic and alkaline reflux, followed by distillation. Residues are then extracted and subjected to SPE purification. Detection and quantitation are conducted by a gas chromatography equipped with nitrogen phosphorus detector, electron capture detector or mass spectrometry detector. The limit of quantitation of the method has been determined at 0.05 ppm for the combined residues of triflumizole and FA-1-1 in filberts. The enforcement methodology has been submitted to the Food and Drug Administration for publication in the Pesticide Analytical Manual, Vol. II (PAM II).
