

attend one of four public scoping meetings held throughout the State.

Based on public scoping comments, the Services prepared a Draft Environmental Impact Statement (DEIS) to analyze the effects of alternatives on the human environment. The DEIS, draft HCP, and draft Implementation Agreement were made available to the public for a 90-day public comment period through a Notice of Availability in the **Federal Register** on February 11, 2005 (70 FR 7245). Comments received on the draft documents and responses to those comments are included in the EIS. Changes to the draft HCP and DEIS resulting from the comments received during the public comment period are reflected in the final HCP and EIS. Implementation of the State's HCP, including issuance of associated ITPs from the Services for endangered, threatened and covered species (should they become listed) is Alternative 2 in the EIS. Three other alternatives are analyzed in the EIS including: Alternative 1, no action, in that neither ITPs nor section 4(d) limits on the application of the prohibition against take would be issued to the state; Alternative 3, amend and implement the conservation plan and issue section 4(d) limits on the application of the prohibition against take for those threatened species identified in the existing NMFS 4(d) rule, and through a new rule that would be developed by FWS for the threatened bull trout; and Alternative 4, ITPs would be issued based on more restrictive forest practices rules that would be incorporated into the State's proposed conservation plan.

This notice is provided pursuant to the ESA and NEPA regulations. The Services will evaluate the applications, associated documents, and comments submitted thereon to determine whether the applications meet the requirements of the ESA and NEPA. The Services' decisions whether to issue ITPs or limits on the application of the prohibition against take will be made based on the EIS, the associated Record of Decision, and the Services' ESA decision documents.
