

describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it proposes to create Class E airspace sufficient in size to contain aircraft executing instrument procedures at Valdez Airport and represents the FAA's continuing effort to safely and efficiently use the navigable airspace.

The Proposal

The FAA is considering an amendment to the Code of Federal Regulations (14 CFR part 71), which would modify existing Class E airspace at St. Paul Island, AK. The intended effect of this proposal is to create Class E airspace upward from 700 ft. and 1,200 ft. above the surface to contain Instrument Flight Rules (IFR) operations at St. Paul Island, AK.

The FAA Instrument Flight Procedures Production and Maintenance Branch has developed one new SIAP and revised five SIAPs for the St. Paul Island Airport. The new approach is the Area Navigation (Global Positioning System (RNAV (GPS)) Runway (RWY) 36, original. The five revised SIAPs are; (1) RNAV (GPS) RWY 18, Amendment (Amdt) 1, (2) Non-directional Beacon (NDB)-A, Amdt 1, (3) NDB/Distance Measuring Equipment (DME) RWY 18, Amdt 3, (4) Localizer (LOC)/DME Back Course RWY 18, Amdt 3, (5) Instrument Landing System (ILS) or LOC/DME RWY 36, Amdt 2. Class E controlled airspace extending upward from 700 ft. and 1,200 ft. above the surface within the St. Paul Island Airport area would be revised by this action. The proposed airspace is sufficient in size to contain aircraft executing these instrument procedures at the St. Paul Island Airport. A corresponding airspace change to Offshore Airspace Area 1234L will be coordinated with the FAA's Airspace and Rules, Office of System Operations Airspace, in accordance with FAA Order 7400.2.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9N, *Airspace Designations and Reporting Points*, dated September 1, 2005, and effective September 15, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to

keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it proposes to create Class E airspace sufficient in size to contain aircraft executing new and revised instrument procedures at the St. Paul Island Airport and represents the FAA's continuing effort to safely and efficiently use the navigable airspace.
