SUPPLEMENTARY INFORMATION:

Coonamesett Farm submitted an application for an EFP on December 27, 2005, for an experiment funded by the Sea Scallop Research Set Aside Program. The experiment would investigate whether requiring vessels to land scallops in a standardized scallop bag would be a viable method of determining compliance with the Sea Scallop Access Area possession limit. This EFP is requested to allow vessels testing a standardized scallop bag to exceed Sea Scallop Access Area possession limits, which are currently set at 18,000 lb (8,165 kg) (see 50 CFR 648.60(a)(5)). While the standardized scallop bag will be used in numbers intended to achieve the 18,000 lb (8,165 kg) possession limit, it is possible that on some experimental trips the use of the standardized bag will result in a landings in excess of 18,000 lb (8,165 kg). To test the standardized bag, Coonamesett Farm proposes to conduct 24 sea scallop access area trips. Prior to departure, each vessel will be issued a number of bags and required to land its catch of scallops in them. The catch from each trip will be examined to determine if a standardized bag can be used to achieve the 18,000 lb (8,165 kg) possession limit. The 24 trips will occur throughout the Access Area open seasons in the Georges Bank Access Areas and the Hudson Canyon Access Area. The specific design and construction of the standardized scallop bag will be determined prior to the issuance of the EFPs.
