

required to submit specific information on habitat restoration projects into the ERAD database through an interactive Web site available over the Internet. The projects that are not funded through the ERA can be voluntarily entered into the database by project managers. Other federal agency and private grant programs may also require recipients to enter project information in the ERAD database.

II. Method of Collection

Project managers will electronically submit estuary restoration project information via NOAA's Estuary Restoration Act Database Web site (<https://neri.noaa.gov/>). The Web site contains a user-friendly data entry interface for project managers to enter and submit project information to the ERAD database. The data entry interface consists of a series of screens, containing several pull-down menus and text boxes, where users can enter specific project information (e.g. location, acreage restored, contacts, monitoring information). To facilitate the collection of information through the data entry interface, NOAA Fisheries provides worksheets containing database fields that can be downloaded and printed from the Web site. These worksheets can be used by project managers to guide information collection, and can then serve as a reference as project managers enter project information through the Web site. The reporting forms are also available in paper format to be sent to project managers as necessary.
