DEPARTMENT OF HEALTH AND HUMAN SERVICES**Office of Inspector General****Program Exclusions: January 2006**

AGENCY: Office of Inspector General, HHS.

ACTION: Notice of program exclusions.

During the month of January 2006, the HHS Office of Inspector General imposed exclusions in the cases set forth below. When an exclusion is imposed, no program payment is made to anyone for any items or services (other than an emergency item or service not provided in a hospital emergency room) furnished, ordered or prescribed by an excluded party under the Medicare, Medicaid, and all Federal Health Care programs. In addition, no program payment is made to any business or facility, *e.g.*, a hospital, that submits bills for payment for items or services provided by an excluded party. Program beneficiaries remain free to decide for themselves whether they will continue to use the services of an excluded party even though no program payments will be made for items and services provided by that excluded party. The exclusions have national effect and also apply to all Executive Branch procurement and non-procurement programs and activities.

Currituck National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Department of the Interior.
ACTION: Notice of availability of the Draft Comprehensive Conservation Plan and Environmental Assessment for Currituck National Wildlife Refuge in Currituck County, North Carolina.

SUMMARY: This notice announces that a Draft Comprehensive Conservation Plan and Environmental Assessment for Currituck National Wildlife Refuge are available for review and comment. The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, requires the Service to develop a comprehensive conservation plan for each national wildlife refuge. The purpose in developing a comprehensive conservation plan is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, plans identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation.

DATES: Individuals wishing to comment on the Draft Comprehensive Conservation Plan and Environmental Assessment for Currituck National

Wildlife Refuge should do so no later than March 13, 2006. Public comments were requested, considered, and incorporated throughout the planning process in numerous ways. Public outreach has included scoping meetings, a review of the biological program, an ecosystem planning newsletter, and a **Federal Register** notice.

ADDRESSES: Requests for copies of the Draft Comprehensive Conservation Plan and Environmental Assessment should be addressed to Tim Cooper, Refuge Manager, Mackay Island National Wildlife Refuge, P.O. Box 39, Knotts Island, North Carolina 27950; Telephone (252) 429-3100; Fax (252) 429-3186. Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the record, which we will honor to the extent allowed by law.
SUPPLEMENTARY INFORMATION: The Service analyzed three alternatives for future management of the refuge and chose Alternative 2, an alternative that addresses the refuge's highest priorities.

- Proposed goals for the refuge include:
- Conserve, protect, and maintain healthy and viable populations of migratory birds, wildlife, fish, and plants, including Federal and State endangered species and trust species.
 - Restore, enhance, and maintain the health and biodiversity of beach and dune systems, maritime forests, and marsh habitats to ensure optimum ecological productivity and protect the water quality of Currituck Sound.
 - Provide the public with safe, quality wildlife-dependent recreational and educational opportunities that focus on the wildlife and habitats of the refuge and the National Wildlife Refuge System.
 - Protect refuge resources by limiting the adverse impacts of human activities and development.
 - Acquire and manage adequate funding, human resources, facilities,

equipment, and infrastructure to accomplish the other refuge goals.
 Also available for review are draft compatibility determinations for recreational hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation.

Alternatives

Alternative 1 maintains the status quo. The refuge would manage very intensively the water levels of the impoundments and the vegetation to create 50 percent good vegetation for migrating waterfowl, but would not manage for mudflats for shorebirds. It would also manage marshes with prescribed fire. The staff would survey waterfowl on a routine basis. The refuge would allow the six priority public use activities: hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. The staff would conduct environmental education and interpretation on a request basis only. There would be no staff stationed at Currituck National Wildlife Refuge. Seven staff members would serve the refuge and be stationed at Mackay Island National Wildlife Refuge. They would spend 2.85 staff years at Currituck Refuge and 4.15 full time equivalent staff years at Mackay Island National Wildlife Refuge.

Alternative 2 proposes moderate program increases. The refuge would develop a habitat management plan and manage all habitats on the refuge. The refuge would manage very intensively the water levels of the impoundments and the vegetation to create 60 percent good vegetation for migrating waterfowl and 20 percent mudflats in the spring for shorebirds when feasible. The Service would add new impoundments. The staff would monitor vegetation in the marshes before and after prescribed burns and inventory vegetation in the maritime swamp forest. They would survey a wide range of wildlife on the refuge. The refuge would continue to allow the six priority public use activities, but would have the capacity
