

SUPPLEMENTARY INFORMATION: Section 101(a)(5)(A) of the MMPA (16 U.S.C. 1361 *et seq.*) directs NMFS to allow, on request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region, if certain findings are made by NMFS and regulations are issued. Under the MMPA, the term "taking" means to harass, hunt, capture, or kill or to attempt to harass, hunt, capture or kill marine mammals.

Authorization may be granted for periods up to 5 years if NMFS finds, after notification and opportunity for public comment, that the taking will have a negligible impact on the species or stock(s) of marine mammals and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses. In addition, NMFS must prescribe regulations that include permissible methods of taking and other means effecting the least practicable adverse impact on the species and its habitat and on the availability of the species for subsistence uses, paying particular attention to rookeries, mating grounds, and areas of similar significance. The regulations must include requirements pertaining to the monitoring and reporting of such taking. Regulations governing the taking incidental to target missile operations on San Nicolas Island, CA, were published on September 2, 2003 (68 FR 52132), and remain in effect until October 2, 2008.

Pursuant to these regulations, NMFS has issued an LOA to the NAWC-WD. Issuance of the LOA is based on findings made in the preamble to the final rule that the total takings by this project will result in only small numbers (as the term is defined in 50 CFR 216.103) of marine mammals being taken. In addition, given the implementation of the mitigation requirements contained in the LOA, the resultant incidental harassment will have no more than a negligible impact on the affected marine mammal stocks or habitats and will not have an unmitigable adverse impact on the availability of such species or stock for taking for subsistence uses. NMFS also finds that the applicant will meet the requirements contained in the implementing regulations and LOA, including monitoring and reporting requirements. This LOA will be renewed annually based on a review of the activity, completion of monitoring requirements and receipt of reports required by the LOA.
