

evolved in presence of periodic fires and low structural diversity diminish in abundance and eventually are extirpated.

The Applicants biological surveys determined that about 5.5 acres of the 75-acre parcel is occupied by sand skinks and the Fish and Wildlife Service believes that bluetail mole skinks also occupy the same 5.5 acres. The Applicants' proposed construction activities would result in harm to skinks due to destruction of foraging, sheltering, and nesting habitat. The Applicants' proposed commercial construction would result in the loss of 5.5 acres of occupied skink habitat that is isolated due to surrounding urban development. Avoidance or minimized impact of the occupied skink habitat was determined to be too costly to the Applicant. In addition, conserving skink habitat on site would only maintain habitat that would be increasingly isolated from other skink habitat. The Applicants' mitigation proposes to acquire, perpetually protect, and manage 10 acres of skink habitat at an off-site location and donate \$20,000 for use in skink habitat acquisition. Take of skinks is anticipated due to commercial development of the Applicants' property, while the off-site mitigation proposed by the Applicants will result in conservation benefits to skinks and several other species endemic to xeric scrub.

The Service has made a preliminary determination that issuance of the requested ITP is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of National Environmental Policy Act. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the EA and HCP. This notice is provided pursuant to Section 10 of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1506.6).

The Service will evaluate the HCP and comments submitted thereon to determine whether the application meets the issuance criteria requirements of section 10(a)(1)(B) of the Act. By conducting an intra-Service section 7 consultation the Service will also evaluate whether issuance of the section 10(a)(1)(B) ITP would comply with section 7 of the Act. The results of this consultation, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITP.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Job Corps program authorized by the Workforce Investment Act (WIA) of 1998, is designed to serve low-income young women and men, 16 through 24, who are in need of additional vocational, educational and social skills training, and other support services in order to gain meaningful employment, return to school or enter the Armed Forces. Job Corps is operated by the Department of Labor through a nationwide network of 118 Job Corps centers. The program is primarily a residential program operating 24 hours per day, 7 days per week, with non-resident enrollees limited by legislation to 20 percent of national enrollment. These centers presently accommodate more than 40,000 students.

The Placement Verification and Follow-up of Job Corps Participants is comprised of three data collection instruments to collect follow-up data on individuals who are no longer actively participating in Job Corps. The instruments consist of modules that include questions designed to obtain the following information: re-verification of initial job and/or school placements; employment and educational experiences; job search activities of those who are neither working nor in school; and information about former participants' satisfaction with the services provided by Job Corps.
