SUPPLEMENTARY INFORMATION: The Privacy Act (5 U.S.C. 552a) embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses and disseminates personally identifiable information. The Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The Letter of Map Amendment (LOMA) system established by this Notice is such a system of records.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses for which such information may be disseminated and the purpose for which the system is maintained.

The Letter of Map Amendment system will be used to support FEMA's administration of the National Flood Insurance Program (NFIP). The National Flood Insurance Act of 1968, Public Law 90-448, as amended by the Flood Disaster Protection Act of 1973, Public Law 93-234, established the NFIP to provide flood insurance in communities that voluntarily adopt and enforce floodplain management ordinances that meet minimum NFIP requirements. As part of the NFIP, FEMA assists communities by producing flood maps that indicate, among other things, which properties are located in special flood hazard areas (SFHA).

Limitations of scale or topographic definition of the source maps used to prepare the Flood Insurance Rate Map (FIRM) may cause small areas that are at or above the one percent annual chance flood elevation to be inadvertently shown within the SFHA boundaries. In SFHAs, flood insurance is required on properties with federally-backed loans. A property outside of an SFHA is not required by FEMA to carry flood insurance, and often lenders do not require individuals who are financing or refinancing properties located outside of SFHAs to buy flood insurance policies. For this reason, individuals seek LOMAs to request that

FEMA reverse the determination that their property is situated in an SFHA.

FEMA offers administrative procedures to review SFHA designations and, with appropriate engineering documentation, to exclude property from inadvertent inclusion in an SFHA. FEMA accomplishes this through a LOMA, in which FEMA officially states its position whether property is located outside of a special flood hazard area. FEMA's regulations for issuing LOMAs can be found in 44 CFR Part 70.

The new LOMA system of records will contain personally identifying information voluntarily provided by applicants (individuals and/or certifiers as described below) applying for LOMAs.

- An individual is any person financing or refinancing structures or parcels of land (hereinafter referred to as "property" or "properties") with a federally-backed loan. Examples of individuals are home owners, investors, and property developers.

- A certifier is a Registered Professional Engineer or Licensed Land Surveyor who provides technical information, such as elevation, to FEMA. Certifiers have the professional credentials to analyze engineering information. The certifier may provide information either electronically or in hard copy on behalf of the individual.

The information collected includes the individual's name, mailing address, signature, and signature date. The individual can voluntarily provide daytime telephone number, e-mail address, and fax number—which are not required—but which enables FEMA to contact the individual should questions arise. In addition, the certifier is required to provide name, professional license number and expiration date, company name, property address or legal description, e-mail address, and business telephone number. The certifier can voluntarily provide a fax number that enables FEMA to fax documents related to the LOMA.

The information will be collected in hard copy format and maintained at FEMA's repository located at 847 South Pickett Street, Alexandria, VA 22034, or electronically through the proposed mapping information platform (MIP). The collected information will be maintained either as paper records or computerized files retrieved by an individual's property address or legal description and/or case number.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this new system of records to the Office of Management and Budget (OMB) and to Congress.
