

the licensee's projected dose for the burial of carbon-14 is conservative based on the volume of the animal containing the carbon-14 from the study, which was noted as being a "coffee can" size (which is variable.) The NRC staff performed a dose modeling evaluation based on a buried volume of 500 grams and using the default parameters in RESRAD, Version 6.22. The model projected a peak dose of 14 mrem to occur in 1965, with a sharp decline to less than 1 mrem in 1971. In either scenario, the calculated value beyond year seven (1968) is below the current 25 millirem limit for unrestricted use of the site as stipulated in 10 CFR 20.1402.

The NRC staff considered the potential impacts of leaching of radioactive material into the shallow groundwater due to the burial of carbon-14 in 1961. In 1965, the shallow surface groundwater on the Carroll College campus was not used as a drinking water source. Additionally, local members of the public obtained their drinking water from the city, whose source was several miles away. There were only two wells identified on the Montana Bureau of Mines and Geology Web site which were installed prior to 1965. The impact of potentially contaminated groundwater was considered as part of the RESRAD dose modeling evaluation and the primary pathway of concern was the direct consumption of water by the resident farmer scenario. Based on the evaluations, there was no impact to groundwater as a result of the one-time burial of carbon-14. The areas of the site where radioactive material had been stored and handled were surveyed on April 9, 2005, by the radiation safety officer from Montana State University. The surveys were performed using Ludlum survey meter with a GM probe and a low energy gamma (NaI) probe. In addition, survey wipes were taken and analyzed on a Packard Liquid Scintillation Counter. The results were less than twice background and adequately meet the criteria for unrestricted use.

The NRC has the option, depending on the licensee's survey and extent of radioactive material that was used at the facility, to perform a close out inspection of the facility. Based on the low-energy beta emitting radioisotopes and the length of time since the last use of radioactive material at the facility, the NRC staff determined that a close-out inspection of the facility was not justified. The licensee's independent survey was sufficient to demonstrate that the facility was suitable for unrestricted use in accordance with 10

CFR Part 20. The environmental impacts resulting from the release of this site for unrestricted use are insignificant. There were no additional activities that resulted in cumulative impacts to the environment.

### III. Finding of No Significant Impact

The NRC staff concludes that the proposed action complies with the radiological criteria for unrestricted use as stipulated in 10 CFR 20.1402. The licensee demonstrated that any remaining residual radioactivity will not result in radiological exposures in excess of the 25 millirem total effective dose equivalent limit specified in § 20.1402. Dose modeling indicates that current and future members of the public will not receive any radiological dose from the burial site. The NRC staff prepared an Environmental Assessment (EA) in support of the requested license amendment. On the basis of this EA, the NRC has concluded that there are no significant environmental impacts and the license amendment does not warrant the preparation of an Environmental Impact Statement. Accordingly, it has been determined that a Finding of No Significant Impact (FONSI) is appropriate.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 1-01063]

### Issuer Delisting; Notice of Application of Dana Corporation, To Withdraw Its Common Stock, \$1.00 Par Value, From Listing and Registration on the Pacific Exchange, Inc.

February 10, 2006.

On January 30, 2006, Dana Corporation, a Virginia corporation ("Issuer"), filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act")<sup>1</sup> and Rule 12d2-2(d) thereunder,<sup>2</sup> to withdraw its common stock, \$1.00 par value ("Security"), from

<sup>1</sup> 15 U.S.C. 78j(d).

listing and registration on the Pacific Exchange, Inc. ("PCX").

The Board of Directors ("Board") of the Issuer approved resolutions on December 1, 2005 to withdraw the Security from PCX. The Issuer stated that the Board determined that delisting the Security from PCX is in the Issuer's best interest because delisting the Security will have no impact on the trading volume of the Security, given the low volume of trading on PCX, and the costs of complying with the regulatory and administrative requirements associated with PCX listing are no longer justified. The Issuer stated that the Security is listed on the New York Stock Exchange, Inc. ("NYSE") and the Issuer will continue to comply with the rules and regulations of NYSE.

The Issuer stated in its application that it has complied with applicable rules of PCX by providing PCX with the required documents governing the withdrawal of securities from listing and registration on PCX. The Issuer's application relates solely to the withdrawal of the Security from listing on PCX and shall not affect its continued listing on NYSE or its obligation to be registered under Section 12(b) of the Act.<sup>3</sup>

Any interested person may, on or before March 9, 2006, comment on the facts bearing upon whether the application has been made in accordance with the rules of PCX, and what terms, if any, should be imposed by the Commission for the protection of investors. All comment letters may be submitted by either of the following methods:

## **SECURITIES AND EXCHANGE COMMISSION**

[File No. 1-08962]

### **Issuer Delisting; Notice of Application of Pinnacle West Capital Corporation To Withdraw Its Common Stock, No Par Value, From Listing and Registration on the Pacific Exchange, Inc.**

February 10, 2006.

On January 27, 2006, Pinnacle West Capital Corporation, an Arizona corporation ("Issuer"), filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act")<sup>1</sup> and Rule 12d2-2(d) thereunder,<sup>2</sup> to withdraw its common stock, no par value ("Security"), from listing and registration on the Pacific Exchange, Inc. ("PCX").

The Board of Directors ("Board") of the Issuer approved resolutions on December 14, 2005 to withdraw the Security from PCX. The Issuer stated that the Board considered the following factors in making the decision to withdraw the Security from PCX: (i) Listing the Security on PCX is no longer in the Issuer's best interests because the Issuer is subject to dual regulation by PCX and the New York Stock Exchange, Inc. ("NYSE"); (ii) the benefits

associated with listing on PCX do not outweigh the costs and additional regulatory obligations, and no longer favor continued listing on PCX; and (iii) the Security is listed on the NYSE and will continue to list on NYSE.

The Issuer stated in its application that it has complied with applicable rules of PCX by complying with all applicable laws in the State of Arizona, the state in which the Issuer is incorporated, and by providing PCX with the required documents governing the withdrawal of securities from listing and registration on PCX. The Issuer's application relates solely to the withdrawal of the Security from listing on PCX and shall not affect its continued listing on NYSE or its obligation to be registered under Section 12(b) of the Act.<sup>3</sup>
