**SUPPLEMENTARY INFORMATION:** We are currently in the process of collaborating with the U.S. Department of Agriculture (USDA) to develop a way to utilize USDA's existing information collection(s) to gather the data required for our purposes. However, this collaboration effort will not be completed before the expiration of the crop census forms in this information collection. Consequently, this information collection is being renewed as an interim measure to ensure a means exists for collection of the crop data necessary to perform our functions. We anticipate that the collaboration process with the USDA will be complete before further renewal of this information collection is required.

**Title:** Crop Acreage and Yields and Water Distribution.

**Abstract:** The annual crop census is taken on certain Reclamation projects primarily for use as a tool in administering, managing, and evaluating various aspects of the Federal reclamation program. The census is used to assist in the administration of repayment and water service contracts, which are used to repay the irrigators' obligation to the Federal government. The census will provide data to

facilitate the required 5-year review of ability-to-pay analysis, which is being incorporated into new repayment and water service contracts. The basis for these reviews is an audit by the Office of the Inspector General, Department of the Interior.

Data from the census are utilized to determine class 1 equivalency computation; *i.e.*, determining the number of acres of class 2 and class 3 land that are required to be equivalent in productivity to class 1 land.

In recent years, the census has provided data which are used to administer international trade agreements, such as the North American Free Trade Agreement. Data from the census are also used by the Office of the Inspector General, Government Accountability Office, and the Congressional Research Service to independently evaluate our program and to estimate the impacts of proposed legislation. These data are supplied to other Federal and State agencies to evaluate the program and provide data for research.

The required 60-day comment period was initiated by a notice published in the **Federal Register** on September 19, 2005 (70 FR 54960, Sept. 19, 2005). No comments were received in response to the 60-day comment period.

**Frequency:** Annually.

**Respondents:** Irrigators and water user entities in the 17 Western states who receive irrigation water service from Bureau of Reclamation facilities. Also included are entities who receive other water services, such as municipal and industrial water through Bureau of Reclamation facilities.

**Estimated Total Number of Respondents:** 1,325.

**Estimated Number of Responses per Respondent:** 1.0.

**Estimated Total Number of Annual Responses:** 1,325.

**Estimated Total Annual Burden on Respondents:** 2,075 hours.
