

authorizes state workforce security agencies to access the NDNH "for purposes of administering an unemployment compensation program under Federal or State law". BAM must utilize this resource as part of the audit of paid claims to detect and investigate claimant employment during the benefit year to determine its effect on the claimant's eligibility for UI.

This requirement will be effective with BAM batch 200801 (sampling week beginning December 30, 2007, and ending January 5, 2008). States may begin to use the NDNH crossmatch as part of their BAM paid claims investigations prior to the effective date. States not participating in the NDNH crossmatch prior to the effective date may crossmatch BAM paid claims sample cases with their SDNH. However, once the state begins to access the NDNH, they must utilize the NDNH as part of the BAM paid claims investigation instead of the SDNH. All BAM paid claims investigations must include the NDNH crossmatch by the effective date (BAM sampling batch 200801).

BAM auditors will conduct fact-finding for those BAM cases in which the claimant's SSN matches one or more records in the NDNH (or SDNH) to determine if there are any issues affecting the claimant's eligibility for UI benefits for the sampled week. Agencies will conduct fact-finding according to the procedures in ET Handbook No. 395.

Pending approval of this information collection request by the Office of Management and Budget, ETA will issue technical specifications for crossmatching BAM cases with the new hire directories. BAM program managers will be responsible for identifying the organizational unit within their state that administers their state's participation in the NDNH or manages their SDNH and for determining the procedures needed to link BAM data with the NDNH or SDNH data.

State agencies that currently use their state's wage records as part of the BAM investigation may continue to do so. However, the use of wage records as part of the BAM investigation is not required.
