

Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center Docket is: (202) 566-1752.

Use EPA's electronic public docket and comment system at <http://www.regulations.gov> to submit or view public comments, access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. When in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov> as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in <http://www.regulations.gov>. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing at <http://www.regulations.gov>. For further information about the electronic docket, go to <http://www.regulations.gov>.

Title: NSPS for Lime Manufacturing (Renewal).

Abstract: The New Source Performance Standards (NSPS) for lime manufacturing plants were proposed on May 3, 1977, and promulgated on April 26, 1984. These standards apply to each rotary lime kiln used in the manufacture of lime, which commenced construction or modification after May 3, 1977. This subpart does not apply to facilities used in the manufacture of lime at kraft pulp mills.

Owners or operators of the affected facilities must make one-time-only reports including notification of startup, initial performance test, notification of any physical or operational change, and notification of the demonstration of the continuous monitoring system (CMS). Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction, or any period during

which the monitoring system is inoperative. Semiannual reports of excess emissions are also required.

Any owner or operator subject to the provisions of this part must maintain a file of these measurements, and retain the file for at least two years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 46 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to adjust the existing ways to comply with any previously applicable instructions and requirements; to train personnel to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

Respondents/Affected Entities: Owner or operator of each lime manufacturing plant.

Estimated Number of Respondents: 41.

Frequency of Response: Semi-annually, initially and on occasion.

Estimated Total Annual Hours Burden: 3,773 hours.

Estimated Total Annual Costs: \$366,056, which includes \$0 annualized capital/startup costs, \$61,500 annual O&M costs, and \$304,556 annual labor costs.

Changes in the Estimates: There is decrease of 661 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to a change in the number of respondents. After a thorough analysis involving industry, and by using the most updated

reports (dated December 2004) from the U.S. Department of the Interior and the U.S. Geological Survey, we arrived at forty-one as the number of sources as compared to fifty-three in the previous ICR.

There is a decline in the reporting and recordkeeping burden cost. The reason for the decline is because there are no new sources expected over the next three years and the adjustment to the number of existing sources as compared to the previous ICR.

Dated: February 12, 2006.

Oscar Morales,

Director, Collection Strategies Division.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at 202-564-7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 1, 2005 (70 FR 16815).

Draft EISs

EIS No. 20050428, ERP No. D-FRC-K03028-CA, Long Beach Liquefied Natural Gas (LNG) Import Project, Construction and Operation of a LNG Receiving Terminal and Associated Facilities, U.S. Army COE 10 and 404 Permits, Long Beach, CA.

Summary: EPA expressed environmental concerns about the projected modeled exceedance of the National Ambient Air Quality Standard for fine particulate matter (PM_{2.5}) from operational emissions of the project. EPA believes there are additional control measures that could be evaluated to mitigate the proposed projects impact on ambient PM_{2.5} concentrations. Concerns were also expressed about localized air emission impacts to surrounding communities and the safety risk evaluation of the onsite storage of certain products. Rating EC2.

EIS No. 20050487, ERP No. D-NRS-J36054-UT, Coal Creek Flood Control

and Parkway Project, Proposed Channel Improvements, Two Irrigation Division Structures on Coal Creek (the Main Street Diversion and the Woodbury Diversion), Cedar City, Iron County, UT.

Summary: EPA expressed concerns about the formulation of the purpose and need statement and the limited range of alternatives analyzed, and requested clarification about air quality impacts the cumulative impacts analysis and whether the impacts in the riparian area have been significant enough to warrant mitigation. Rating EC2.

EIS No. 20050432, ERP No. DS-FHW-E40714-GA, US 411 Connector, From US411/GA-20 Interchange with US41 to US 411 Interchange with I-75, Updated Information, Funding and U.S. Army COE Section 404 Permit, Bartow County, GA.

Summary: EPA has expressed environmental concerns about the proposed project because of the potential for significant direct and indirect impacts to water quality and threatened and endangered fish species as well as water quality. Rating EC2.

Final EISs

EIS No. 20050238, ERP No. F-AFS-J36053-UT, Monticello and Blanding Municipal Watershed Improvement Projects, Implementation, Manti-La Sal National Forest, Monticello Ranger District, San Juan County, UT.

Summary: EPA supports Alternative C which should reduce the wetland and stream impacts associated with replacement of the water collection and piping systems for the municipal water supply system for the City of Monticello. EPA remains concerned about the level of ecological benefits attributed to logging spruce stands at risk for a spruce beetle invasion.

EIS No. 20050313, ERP No. F-DOE-J39033-UT, Moab Uranium Mill Tailings Remediation, Proposal to Clean Up Surface Contamination and Implement a Ground Water Strategy, Grand and San Juan Counties, UT.

Summary: EPA supports the Department of Energy's selection of the Crescent Junction off-site location and the movement of these tailings by rail. This location has the least environmental and cultural impact of any of the alternatives considered. The stable geologic and surface conditions at the Crescent Junction alternative will provide isolation of these tailings without public health risks for the long term. Moving these tailings by rail will avoid disruption of highway traffic and can be accomplished in the least amount of time.

EIS No. 20050439, ERP No. F-COE-E09810-MS, Enhanced Evaluation of Cumulative Effects Associated with U.S. Army Corps of Engineers Permitting Activity for Large-Scale Development in Coastal Mississippi, Hancock, Harrison, Jackson, and Mississippi Counties, MS.

Summary: EPA supports the use of the proposed permitting methodologies along with the trends analysis approach.

EIS No. 20060012, ERP No. FS-COE-K60105-CA, U.S. Army National Training Center, Additional Maneuver Training Land at Fort Irwin, Implementation, San Bernardino County, CA.

Summary: EPA's concerns were addressed in the EIS; therefore, EPA had no objection to the proposed project.

Dated: February 21, 2006.

Robert W. Hargrove,

Director, NEPA Compliance Division Office of Federal Activities.
