Employers can use the information collected under the HAZWOPER rule to develop the various programs the standard requires and to ensure that their employees are trained properly about the safety and health hazards associated with hazardous waste operations and emergency response to hazardous waste releases. OSHA uses the records developed in response to this standard to find adequate compliance with the safety and health provisions. The employer's failure to collect and distribute the information required in this standard will affect significantly OSHA's effort to control and reduce injuries and fatalities.
