404 permit and a floodplain development permit from the State Emergency Management Agency may be required.

Alternatives under consideration include (1) taking no action, (2) implementing transportation system management options, (3) and build alternatives. Substantial preliminary coordination has occurred with local officials. As part of the scoping process, an interagency coordination meeting will be held with all appropriate Federal, state and local agencies. This coordination will continue throughout the study as an ongoing process. In addition, public information meetings and further meetings with community officials will be held to solicit public and agency input. A location public hearing will be held to present the findings of the Draft EIS. Public notice will be given announcing the time and place of all public meetings and the public hearing.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA or MoDOT at the addresses previously provided.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highways Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on February 13, 2006.

Peggy J. Casey,
Environmental Projects Engineer, Jefferson City.

[FR Doc. 06–1774 Filed 2–24–06; 8:45 am]
to the public, 24-hour access to restrooms, and parking for automobiles and heavy trucks. Section 1310 also requires the standards for designation as an Interstate Oasis to include the “appearance of a facility” and the proximity of the facility to the Interstate system, and requires FHWA to design a logo to be displayed by a designated Interstate Oasis facility. Further, section 1310 requires that, if a State elects to participate in the Interstate Oasis program, any facility meeting the standards for designation shall be eligible for designation as an Interstate Oasis.

A related provision of SAFETEA–LU, section 1305, authorized a separate program to provide Federal funding for building, expanding, or improving truck parking facilities along the National Highway System. The FHWA plans to issue a separate notice in the Federal Register to announce this program and solicit applications for use of the available funding. The FHWA will closely coordinate the section 1305 and section 1310 programs to assure they are compatible and complementary to each other in serving the public need.

Description of Proposed Interstate Oasis Program

The FHWA has developed a preliminary framework for an Interstate Oasis program that FHWA believes is responsive to the requirements in section 1310 of SAFETEA–LU. Figures will be developed and sign numbers will be designated at a later date to illustrate certain signing elements after they are finalized. Therefore, figure numbers included in the draft text of the program document are left blank at this time, and sign numbers are general and not specific. The draft text of the program document is as follows: “An Interstate Oasis shall be defined as a facility near an Interstate highway, but not within the Interstate right-of-way, designated by a State after meeting certain eligibility criteria, that provides products and services to the public, 24-hour access to public restrooms, and parking for automobiles and heavy trucks.

Interstate Oasis facilities shall comply with laws concerning:
1. The provisions of public accommodations without regard to race, religion, color, age, sex, national origin, or disability; and
2. The State and local licensing and approval of such service facilities.

If a State elects to provide Interstate Oasis signing, there should be a statewide policy, program, procedures, and criteria for the designation and signing of a facility as an Interstate Oasis. To qualify for designation and signing as an Interstate Oasis, a business should, at a minimum:

1. Be located no more than 3 miles from an interchange with an Interstate highway, except a lesser distance may be required when State laws restrict truck travel to lesser distances from the Interstate system;
2. As determined by an engineering study, be accessible via highways that are unrestricted as to vehicle weight or vehicle type, size, or weight and from which road users can safely and conveniently travel to the facility, enter and leave the facility, return to the Interstate highway, and continue in the same direction of travel;
3. As determined by an engineering study, have physical geometry of site layout and driveway access to safely and efficiently accommodate ingress, on-site travel, maneuvering, and parking, and egress by all vehicles, including heavy trucks of the size and weight anticipated to use the facility; and
4. Have modern sanitary facilities (rest rooms) and drinking water available to the public at no charge or obligation at all times (24 hours per day, 365 days per year);
5. Have adequate and well lit parking accommodations for vehicles, including heavy trucks, with maximum allowed parking duration not less than 10 hours, to meet demands based on volumes, the percentage of heavy vehicles in the Interstate highway traffic, and other pertinent factors;
6. Be staffed by at least one person on duty at all times (24 hours per day, 365 days per year);
7. Provide, at a minimum, the following products and services:
   a. Public telephone;
   b. Food (vending, snacks, fast food, and/or full service);
   c. Fuel, oil, and water for automobiles and trucks.

Statewide criteria may impose additional minimum requirements, beyond those listed above, determined necessary by the State to promote and enhance road user safety, efficiency, and productivity. If a State elects to provide Interstate Oasis signing, any facility meeting the State’s minimum criteria shall be eligible for designation as an Interstate Oasis.

Signing to denote the availability of an Interstate Oasis at an interchange, to guide road users to an Interstate Oasis, or to designate a business as an Interstate Oasis should incorporate the Interstate Oasis symbol depicted in Figure “X”. [Figure to be developed and numbered later.] States electing to provide Interstate Oasis signing should use only one of the following signing practices on the freeway for any given exit:

1. If Specific Service signing (See MUTCD Chapter 2F) is provided at the interchange, a 12-inch diameter circular “patch” containing the Interstate Oasis symbol may be located in the lower right-hand corner of the specific service logo panel for the designated business in a manner in which it touches both the specific service logo and the blue sign panel; or
2. If General Service signing (See MUTCD Figures 2E–41 and 2E–42) is provided at the interchange, the Interstate Oasis General Service Sign (D9–x) may be included on or appended above or below an existing D9–18, D9–18a, or D9–18e General Service sign; or
3. If no other service signing is provided at the interchange, the Interstate Oasis General Service Sign (D9–x) may be appended above or below an existing ground mounted Advance Guide or Exit Direction sign, or a separate D9–y sign, incorporating both the Interstate Oasis symbol and the legend “Interstate Oasis” may be installed in an effective location, between the Advance Guide sign and the Exit Direction sign and with adequate spacing from other adjacent signs, in advance of the exit leading to the Oasis. The D9–y sign shall have a blue background and white border and legend and shall contain an action message such as “NEXT EXIT” for unnumbered interchanges or, for numbered interchanges, the exit number as illustrated in Figure “Y.” [Figure to be developed and numbered later.]

Signing should be provided near the exit ramp terminal and along the cross road to guide road users from the interchange to the Interstate Oasis and back to the interchange.”

Discussion of Proposed Interstate Oasis Program

The FHWA believes that the draft text stated above meets the intent and the specific requirements of section 1310 of SAFETEA–LU and enhances the safety, efficiency, and productivity of the highway system and its users. It would establish minimum criteria meeting the needs of travelers on the Interstate highway system in a manner that any State could implement despite wide varieties in existing conditions and needs from State to State. Similar to criteria for businesses to be eligible for Specific Services signing, detailed in Chapter 2F of the Manual on Uniform Traffic Control Devices (MUTCD), States could decide to impose additional criteria, beyond the minimum national criteria, that they deem appropriate for their State.
Section 1310 specifically states that the standards for designation of an Interstate Oasis shall include standards relating to “the appearance of a facility.” The FHWA does not believe that it is feasible to prescribe uniform nationwide standards for facility appearance, in terms of building design, site layout, or other potential elements of appearance. The FHWA believes that the minimum eligibility criteria, plus the use of a standard nationwide Interstate Oasis symbol (logo) on official traffic signs and on private business signing of designated facilities, will meet the intent of assuring that travelers can readily identify the specific locations of facilities meeting the required criteria.

The proposed Interstate highway signing requirements for exits providing access to an Interstate Oasis generally follow the principles of General Services and Specific Services signing, as established in Part 2 of the MUTCD, and the FHWA’s Interim Approval dated September 6, 2005, for use of “RV Friendly” symbol “patches” on Specific Services signs. The complete MUTCD and FHWA’s September 6, 2005, Interim Approval can be accessed at FHWA’s MUTCD Web site at http://mudt.fhwa.dot.gov. Proposed sign numbers and figure numbers in the draft text are indeterminate at this time and will be finalized in the completed document.

Specific Questions on Which FHWA Is Seeking Comments

The FHWA is requesting comments on this proposed Interstate Oasis program as described above. The FHWA is also seeking comments and input regarding several specific questions to help refine and finalize the program:

1. Is 3 miles an appropriate maximum distance from the interchange? The maximum distance specified in MUTCD Section 2F.01 for specific services is 3 miles. Is the concept of identifying an Interstate Oasis by adding a “patch” to the Specific Service logo panel is used, consistency in the distance policies may be needed. States would have the flexibility to require a closer distance in their State policies, especially if a State’s laws limit certain trucks to a lesser distance when traveling off the Interstate system. However, in some sparsely populated areas, it may be difficult to find any facilities within 3 miles that would qualify as an Interstate Oasis along very long sections of Interstate highways. Should States have the flexibility to extend the 3-mile maximum (as they can do for existing Specific Services) in cases such as this?

2. Should the criteria for safe and convenient access to and from a potential Interstate Oasis facility, and for adequate on-site geometry, be more specific, or is it sufficient to require the States to perform an engineering study to make these determinations?

3. Should the minimum national criteria require a specific minimum number of parking spaces for cars and/or heavy trucks, or a specific minimum percentage of total spaces that must be designed for use by heavy trucks? If so, what should those numbers be and on what basis or rationale are they recommended?

4. Are there other products and services beyond those listed that are essential for inclusion in the minimum national criteria for designation as an Interstate Oasis? States will have the flexibility to add their own requirements for products and/or services beyond the national minimums. However, States will not have the ability to waive any required products or services contained in the minimum national criteria.

5. Should States have the flexibility to designate and sign an exit for an Interstate Oasis if all the criteria cannot be met by any one business at the exit, but the combination of two or more businesses in close proximity to each other do meet the criteria? For example, one particular business may meet all criteria except offering fuel, but fuel is continuously available from another nearby business. In areas where no public rest areas are available for very long distances along the Interstate highway, would allowing States this flexibility for Interstate Oasis designation better serve the public need?

6. What symbol (logo) should be used to indicate an Interstate Oasis? The symbol must be simple, conspicuous and legible from a long distance at freeway speeds, and easily understood. It must also be capable of being displayed by designated businesses on their facilities and on their private signing.

7. If a State provides separate signing, such as “Interstate Oasis Next Exit”, advising road users of the availability of an Interstate Oasis at an interchange, should the business designated as an Interstate Oasis be disqualified from having business logos on Specific Service signs for gas, food, etc. at that interchange? Conversely, should the States have the flexibility to include the name and/or business logo of the designated business on the separate signing, such as “Interstate Oasis—Business Name/Logo—Next Exit”?

8. Assuming proper marketing and public education, will the name “Interstate Oasis” be readily understood by the public and identified with the type of service offered? Utah and Vermont use the names “Rest Stop” and “Rest Exit,” respectively, for the types of facilities contemplated under the Interstate Oasis program. Would the Vermont or Utah names, or other names, better serve the public, and if so, what names are suggested and why?

9. What educational and marketing efforts would be necessary to familiarize travelers and businesses with this program?

Comments regarding the program and/or the questions listed above should clearly state the reasoning behind the responses. After receiving and considering comments submitted to the docket in response to this Notice, the FHWA may issue a policy memorandum detailing the Interstate Oasis program. The FHWA also may propose revising the MUTCD via the normal formal rulemaking process, to add pertinent standards, guidance, and options regarding Interstate Oasis signing in a future edition of the MUTCD.

Issued on: February 16, 2006.

J. Richard Capka,
Acting Federal Highway Administrator.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2006–23669]

Notice of Request for Clearance of a New Information Collection: Commercial Driver’s License Policies and Practices Among the 51 Jurisdictions

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces FMCSA’s plan to submit the Information Collection Request (ICR) abstracted below to the Office of Management and Budget (OMB) for approval and comment. The ICR is related to Commercial Driver’s License (CDL) policies and practices among the 50 States and the District of Columbia (referred to as the 51
