

requirements for veterinary biological products. Prior to conducting a field test on an unlicensed product, an applicant must obtain approval from the Animal and Plant Health Inspection Service (APHIS), as well as obtain APHIS' authorization to ship the product for field testing.

To determine whether to authorize shipment and grant approval for the field testing of the unlicensed product referenced in this notice, APHIS conducted a risk analysis to assess the potential effects of this product on the safety of animals, public health, and the environment. Based on the risk analysis, APHIS has prepared an environmental assessment (EA) concerning the field testing of the following unlicensed veterinary biological product:

Requester: Intervet, Inc.

Product: Marek's Disease-Newcastle Disease Vaccine, Serotypes 2 and 3, Live Virus, Live Marek's Disease Vector.

Field Test Locations: Alabama, Arkansas, Delaware, Georgia, Maryland, Missouri, North Carolina, and South Carolina.

The above-mentioned product is a live recombinant virus consisting of the avirulent Herpesvirus of Turkeys (HVT) vector expressing a gene of Newcastle disease virus. The vaccine is for use in chickens as an aid in the prevention of disease caused by Marek's disease virus and Newcastle disease virus.

The EA has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provision of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Unless substantial issues with adverse environmental impacts are raised in response to this notice, APHIS intends to issue a finding of no significant impact (FONSI) based on the EA and authorize shipment of the above product for the initiation of field tests following the close of the comment period for this notice.

Because the issues raised by field testing and by issuance of a license are identical, APHIS has concluded that the EA that is generated for field testing would also be applicable to the proposed licensing action. Provided that the field test data support the conclusions of the original EA and the issuance of a FONSI, APHIS does not intend to issue a separate EA and FONSI to support the issuance of the product license, and would determine that an

environmental impact statement need not be prepared. APHIS intends to issue a veterinary biological product license for this vaccine following completion of the field test provided no adverse impacts on the human environment are identified and provided the product meets all other requirements for licensing.

Authority: 21 U.S.C. 151–159; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 24th day of February 2006.

Acting Administrator, Animal and Plant Health Inspection Service.

Title: Long-Term Contracting.
OMB Number: 0578-0013.
Expiration Date of Approval: August 31, 2006.

Type of Request: Extension and revision of a currently approved collection for which approval will expire.

Abstract: The primary objective of NRCS is to work in partnership with the American people and the farming and ranching community to conserve and sustain our natural resources. The purpose of Long-Term Contracting information collection is to provide for programs to extend financial and technical assistance through easements and long-term contracts to landowners and others. These programs provide for making land use changes and installing conservation measures and practices to conserve, develop, and use the soil, water, and related natural resources on private lands. For cost-share programs, Federal financial and technical

assistance is based on a conservation plan or schedule of operations that is made a part of an agreement, contract, or easement for a period of time of no less than 1 year and no greater than 10 years. Under the terms of the agreement, the participant agrees to apply, or arrange to apply, the conservation treatment specified in the conservation plan or schedule of operations. In return for this agreement, Federal cost-share payments are made to the land user, or third party, upon successful application of the conservation treatment. For easement programs, NRCS purchases from participants, a conservation easement and provides for the easement's protection and management for the life of the easement.

The information collected through this package is used by NRCS to ensure the proper use of program funds, including application for participation, easement acquisition, contract implementation, conservation planning, and application for payment.

NRCS will ask for a 3-year OMB approval, with revision, within 60 days of submitting the request.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 1.42 hours or 85.2 minutes per response.
