**SUPPLEMENTARY INFORMATION:**

#### I. Introduction

The Nuclear Regulatory Commission (NRC) has received, by letter dated June 30, 2004, a license amendment application from BWX Technologies, Inc., requesting a renewal of its materials license at its Mt. Athos site located in Lynchburg, Virginia. Materials License SNM-42 authorizes the licensee to possess nuclear materials, manufacture nuclear fuel components, fabricate research and university reactor components, fabricate compact reactor fuel elements, perform research on spent fuel performance, and handle the resultant waste streams, including recovery of scrap uranium.

Specifically, the amendment requests to continue operations as authorized in the current license and requests that the renewed license term be 20 years.

An NRC administrative review, documented in a letter to BWX Technologies, Inc., dated March 17, 2005, found the application acceptable to begin a technical review. If the NRC approves the amendment, the approval will be documented in an amendment to NRC License No. 70-27. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report and an Environmental Assessment.
