POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders, computer disks, and on password-protected computers or servers.

RETRIEVABILITY:

Records are normally retrieved numerically by the "M Number," a number assigned by the MOD when it receives a record. Records will be cross-referenced by the beneficiary's health insurance claim number; beneficiary's, physician's, provider's, supplier's, or other appellant's name; or ALJ appeal number.

SAFEGUARDS:

a. *Authorized Users:* Only agency employees and contractor personnel whose duties require the use of information in the system. In addition, such agency employees and contractor personnel are advised that the information is confidential and of criminal sanctions for unauthorized disclosure of information.

b. *Physical Safeguards:* Paper records are maintained in file cabinets, offices, and other secure areas to which only authorized individuals have access. Computer terminals are in secured areas that only authorized individuals may use.

c. *Procedural Safeguards:* Employees who maintain records in the system are instructed to grant regular access only to authorized users. Data stored in computers or on servers are accessed through the use of passwords known only to authorized personnel. Contractors who maintain records in this system are instructed to make no further disclosure of the records except as authorized by the system manager and permitted by the Privacy Act.

Privacy Act language is included in contracts related to this system.

RETENTION AND DISPOSAL:

The period of retention of the paper case file depends upon the final action taken by the MAC. If the final action requires the CMS contractor to effectuate a decision, the case file is sent to the contractor immediately after the MAC has entered its final decision. When a case is remanded to an ALJ, the case file is forwarded with the order of remand to the appropriate hearing office. If the MAC enters an unfavorable decision or a denial of review of an ALJ decision, the case file is stored and maintained in the MAC file room for 6 months. If the MAC enters an order of dismissal or a denial of review of an ALJ dismissal, the case file is stored and maintained for 3 months. At the end of the applicable period, the case file is sent to the designated CMS contractor or SSA. If a case is appealed to Federal District Court, the case file is stored and maintained for 3 months after the certified copy of the record has been furnished to the Court and at that point is sent to the contractor or SSA.

Workpaper documents created by the MAC or MOD are not included in the case file and are destroyed at the time the MAC final action is released. Electronic versions of case disposition documents are saved on the computer database for four years and then deleted. Electronic case tracking records are maintained indefinitely on the computer database, with daily updating to the storage area network.

Centers for Medicare and Medicaid Services

Notice of Grant Award to The National Council on the Aging, To Evaluate a Project Entitled, "Cost-Effective and Scalable Strategies for Enrolling Medicare Beneficiaries in Medicare Prescription Drug Extra Help"

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Notice of grant award.

SUMMARY: The Centers for Medicare and Medicaid Services has awarded a grant entitled, "Cost-Effective and Scalable Strategies for Enrolling Medicare Beneficiaries in Medicare Prescription Drug Extra Help" to The National Council on the Aging, 300 D Street, SW., Suite 801, Washington, DC 20024, in response to an unsolicited proposal. The period of performance is March 1, 2006 through February 28, 2007 (Year 1). The applicant proposes to use private-public partnerships to support a five-year strategy of identifying and enrolling eligible beneficiaries through a series of tailored, list-driven intervention approaches already known to be effective in Low-Income Subsidy (LIS) enrollment. The National Council on the Aging (NCOA) is partnering with Benefits Data Trust (BDT) to lead this list-driven intervention research project. They have already received private funds which they plan to award in grants to support test interventions for the proposed study. NCOA expects to test 24-30 intervention approaches over a five-year period.

The NCOA team is soliciting CMS cooperation and support to accomplish two objectives critical to the success of the interventions. First, the proposed project will facilitate an ongoing partnership between NCOA and CMS to refine marketing lists by identifying beneficiaries already enrolled in the

Medicare Part D Low-Income Subsidy (LIS) or Medicaid. This will allow BDT to create the "cleanest" list possible of potential LIS-eligibles. BDT reported that use of similarly refined lists for outreach efforts to low income populations has increased the enrollment success rate, and decreased the cost of enrollment.

Secondly, NCOA is seeking CMS funding to evaluate alternative, list-based outreach strategies. NCOA intends to partner with L&M Policy Research for the evaluation of intervention approaches. In addition, NCOA will rely on Bridgespan to be an advisor for cost-effectiveness studies. Evaluation of these approaches could supplement existing market research knowledge, and be useful for quality improvement of ongoing and future beneficiary outreach efforts for LIS.
