FOR FURTHER INFORMATION CONTACT: Jane DiCosimo, Council staff, telephone: (907) 271-2809.

SUPPLEMENTARY INFORMATION: The Halibut Stakeholder Committee will identify common principles and goals to develop a problem statement and define two alternatives for a future analysis. One alternative would be an allocation based program. Elements to be included in the plan should include, but not be limited to:

1. A percentage based allocation that would float up and down with abundance in a fashion similar to the commercial longline Total Allowable Catch (TAC);

2. Subdivision of Area 2C and 3A into smaller geographic sub-districts, including time certain establishment of local area management plans (LAMPs) and super-exclusive registration areas;

3. Management measures that will be used to enforce the allocation, including:

a. the current suite of measures to reduce harvests under the Guideline Harvest Level (GHL) (i.e., one trip per vessel per day, no harvest by skipper and crew, and annual limit of 5 or 6 fish per person (for Area 2C only);

b. Measures being pursued by the State of Alaska in 2006, including:

i. a halibut reporting requirement in charter boat logbooks with methodology to ensure accuracy;

ii. a proposed regulation to the Board of Fish to prohibit retention or harvest of fish by skipper and crew members when clients are on board; and

iii. limit the number of lines fished to the number of clients;

c. Other annual bag limits;

d. Limitations on days fished (either total number of days or by excluding specific days of the week);

e. Reduced daily limits including size limitations for the second fish caught;

f. Subtraction of any allocation exceedence from the following year's allocation;

g. Federal moratorium or control date of December 9, 2006 and/or a State limited entry program with delayed transferability;

h. Mechanisms which, if the charter harvest continues to grow, would allow
