BILLING CODE 4163-18-P

**DEPARTMENT OF HEALTH AND
HUMAN SERVICES**

**Centers for Disease Control and
Prevention**

**Government-Owned Inventions;
Availability for Licensing and
Cooperative Research and
Development Agreements (CRADAs)**

AGENCY: Centers for Disease Control and
Prevention Technology Transfer Office;
Department of Health and Human
Services.

ACTION: Notice.

SUMMARY: The invention named in this
notice is owned by agencies of the
United States Government and is
available for licensing in the United
States (U.S.) in accordance with 35
U.S.C. 207, and is available for
cooperative research and development
agreements (CRADAs) in accordance
with 15 U.S.C. 3710a, to achieve
expeditious commercialization of
results of federally funded research and
development. A provisional patent
application has been filed. A Patent
Cooperation Treaty (PCT) application
and national stage foreign patent
applications claiming priority to the
Patent Cooperation Treaty (PCT)
application are expected to be filed
within the appropriate deadlines to
extend market coverage for U.S.
companies and may also be available for
licensing.

ADDRESSES: Licensing and CRADA
information, and information related to
the technology listed below, may be
obtained by writing to Suzanne Seavello
Shope, J.D., Technology Licensing and
Marketing Scientist, Technology
Transfer Office, Centers for Disease
Control and Prevention (CDC), Mailstop
K-79, 4770 Buford Highway, Atlanta,
GA 30341, telephone (770)488-8613;
facsimile (770)488-8615; or e-mail
sshope@cdc.gov. A signed Confidential
Disclosure Agreement (available under
Forms at <http://www.cdc.gov/tto>) will be
required to receive copies of
unpublished patent applications and
other information.

Diagnostics

*Immunoassay for Diagnosis of
Orthopoxvirus Infection*

A CDC-developed immunoassay may
be used for the diagnosis of infection
with Orthopoxviruses (e.g. Monkeypox,
Variola) by detection of acute phase
immune responses that correlate to
recent infection. With recent recognition
of Orthopox viruses as emerging
infectious agents with zoonotic
transmission capabilities as well as
select agents for bioterrorism, assays for
the detection or diagnosis of infections
are sought. This assay provides a rapid
and simple method for detection of
infection with these viruses related to
zoonotic transmission or bioterrorism
events involving such viruses.

Use of the assay produced high levels
of sensitivity during the 2003
Monkeypox outbreak in North America
when compared to PCR.
Commercialization of the ELISA test
may provide a standard screening tool
for diagnosis of Orthopoxvirus as well
as a surveillance tool for exposure.

The immunoassay may also be useful
at the state level for BT surveillance
including an opportunity for use in
reference labs. Reagents used in the
assay are available through CDC
laboratories and for commercial
development of the assay. Further
refinement of the assay may result in the
development of additional reagents for
incorporation into the assay.

Inventors: Kevin L. Karem, Inger K.
Damon and Joanne L. Patton.

Software

*Computer Software for Automating
Permeation Testing Data Analysis*

Data analysis for chemical protective
clothing (CPC) permeation testing
involves a number of equations and
experimental factors. Experimenter bias
and possible calculation errors are
critical issues when determining
permeation parameters. In order to
compare results among different
laboratories and manufacturers, the
normalized breakthrough time is
required since it is not dependent on the
detection limits of the analytical system.
However, calculating the normalized
breakthrough time requires the use of
polynomial curve fitting, polynomial
derivatives, and quadratic equations.
Solving these equations, without a
computer program, would be very
difficult. Therefore, a unique computer
program using Microsoft Visual C++,
referred to as "Permeation Calculator",
has been developed at the National
Institute for Occupational Safety and
Health/National Personal Protective
Technology Laboratory (NIOSH/NPPTL)
to calculate the permeation parameters.
The program imports data and then
calculates the permeation parameters;

including breakthrough detection time, ASTM normalized breakthrough time, European normalized breakthrough time, and steady-state permeation rate. The calculation of these parameters is based on a series of strategies, approaches, and algorithms. At the end, the program displays all the permeation parameters as a report file that can be saved as a Microsoft Excel file or a text file. The program reduces the time spent on data analysis from hours to seconds.

Inventors: Pengfei Gao and Beth Tomasovic.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Child Care Case-Level Report.
OMB No.: 0970-0167.

Description: Section 658K of the Child Care and Development Block Grant Act of 1990 (Pub. L. 101-508, 42 U.S.C. 9858) requires that States and Territories submit monthly case-level data on the children and families receiving direct services under the Child Care and Development Fund. The implementing regulations for the statutorily required reporting are at 45 CFR 98.70. Case-level reports, submitted quarterly or monthly (at grantee option)

include monthly sample or full population case-level data. The data elements to be included in these reports are represented in the ACF-801. Disaggregate data is used to determine program and participant characteristics as well as costs and levels of child care services provided. This provides ACF with the information necessary to make reports to Congress, address national child care needs, offer technical assistance to grantees, meet performance measures, and conduct research. Consistent with the statute and regulations, ACF requests extension of the ACF-801.

Respondents: States, the District of Columbia, and Territories including Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
ACF-801	56	4	20	4,480

Estimated Total Annual Burden Hours: 4,480.

Additional Information: Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Administration, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. E-mail: infocollection@acf.hhs.gov.

OMB Comment: OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendations for the proposed information collection should be sent directly to the following: Office of Management and Budget, Paperwork Reduction Project, Attn: Desk Officer for ACF, E-mail address: Katherine_T_Astrich.eop.gov.

Dated: February 2, 2006.

Robert Sargis,

Reports Clearance, Officer.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[USCG-2006-24052]

Propeller Strike Injury Avoidance Workshop

AGENCY: Coast Guard, DHS.

ACTION: Notice of meeting.

SUMMARY: The U.S. Coast Guard Office of Boating Safety, at the recommendation of the National Boating Safety Advisory Council (NBSAC) is convening a Propeller Strike Injury Avoidance Workshop to address propeller strike avoidance issues. The workshop will be open to the public.

DATES: The workshop will be held on Tuesday, March 21, 2006, from 8:30 a.m. to 5 p.m. and Wednesday, March 22, 2006, from 8 a.m. to 2:30 p.m. The workshop may close early if all business is finished.

ADDRESSES: The workshop will be held at the Crowne Plaza Hotel, 1480 Crystal Drive, Arlington, VA. This notice is available on the Internet at <http://dms.dot.gov> and at <http://uscgboating.org>.

FOR FURTHER INFORMATION CONTACT: Daniel McCormick, Project Manager, Office of Boating Safety, U.S. Coast Guard telephone 202-267-6894, fax 202-267-4285. If you have questions on

viewing material in the docket, call Renee V. Wright, Program Manager, Docket Operations, Department of Transportation, telephone 202-493-0402.

SUPPLEMENTARY INFORMATION: The Commandant of the U.S. Coast Guard is responsible for carrying out the National Recreational Boating Safety Program. Recreational boaters, swimmers, and divers are at risk from recreational boats as a result of incidents causing impact with propellers, lower units and appendages. The Coast Guard is engaged with industry, other government organizations, and the public to raise the level of public awareness regarding this safety risk, encourage technological advancement to lower the level of risk, and consider possible appropriate regulatory action. Although significant progress has been made, the Coast Guard intends to continue its efforts to foster active efforts to eliminate propeller related injury as a significant risk to the public.

The workshop will include a panel discussion of educational, technological, and any other issues relevant to the mitigation/elimination of propeller injury hazards. Panel members have been selected based on the unique perspective and benefit their input would add to the discussions. We plan to prepare minutes of the discussions and distribute them to everyone who registers attendance at the meeting by
