FOR FURTHER INFORMATION CONTACT: Andrew Wright or Tammy Adams, (301)713-2289.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 et seq.) and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

The applicant, NMML, is requesting permission to conduct the following five research projects on four species of pinnipeds breeding in the California Channel Islands, and hauled-out along the coasts of California, Oregon and Washington: (1) Population and health assessment of California sea lions (CSL); (2) ecology of infectious diseases, environmental toxins, and contaminants in CSL; (3) age- and sex-specific partitioning of resources by CSL, harbor seals (HS), and northern elephant seals (NES); (4) evaluation of antihelminthic treatments on CSL and northern fur seals (NFS); and (5) evaluation of handling methods on CSL pups. The objectives are to: (1) Monitor trends in population parameters and health of

CSL; (2) investigate the roles environmental toxins and contaminants play in the susceptibility to infectious diseases and the development of cancer in CSL; (3) investigate how the environmental factors that influence the foraging ecology of CSL, HS, and NES may affect their foraging distributions; (4) determine if antihelminthic treatments can increase survivorship in CSL and NFS pups; and (5) comparatively evaluate the effects of different combinations of handling techniques. Population assessment of CSL is a continuation of a long-term program designed to meet the needs of the NMFS mandate to monitor population health of pinnipeds. To achieve the objectives of the various research projects, the applicant has requested to harass, capture, sample (blood and various tissues), mark (by dye, flipper tag, neoprene patch, and hot brand), and attach instruments to individuals of all four species, and inject CSL and NFS pups with either an antihelminthic treatment or placebo. Please refer to the tables in the application for details of the numbers of marine mammals that would be affected by the various research activities. The applicant has also requested allowance for a limited number of mortalities of each species per year incidental to the research. The permit would expire 5 years after the date of issuance.

Concurrent with the publication of this notice in the Federal Register, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: March 6, 2006.

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.
